## Executive Summary

Metro Trains Sydney (MTS) operates metropolitan rail services for the M1 Metro Northwest and Bankstown line (M1 Line) which is a single network of 66 kilometres and 31 stations. The Northwest and City portions are in operation with the Southwest (SW) portion in development.

This Heritage Management Plan is designed to meet the obligations under the OTS2 Operations and Maintenance contract to Sydney Metro Authority (SMA) to maintain the heritage assets within the MTS Licensed Maintenance Area for the M1 Line in accordance with the *Heritage Act 1977 (NSW)*.

As a final version of the Metro Trains Services Licensed Maintenance Area and the agreement on the division of responsibilities between MTS and SMA is still being negotiated, this Heritage Management Plan will be revised as this content becomes available.

The revision and update has been carried out to ensure it is functioning as intended. Cyclical reviews of the Heritage Management Plan will be undertaken as major changes occur at the various Licensed Maintenance Areas. The timing for these reviews will generally be every 6 months until first passenger service and then will revert to annual reviews. The revision and update should include the relevant policies and procedures from the Conservation Management Plans and Conservation Management Strategies for the listed heritage places within the Licensed Maintenance Area that are being prepared by Sydney Metro Authority.

This Heritage Management Plan is based on best practice heritage management guidelines in accordance with the NSW Heritage guidelines, including the State Agency Heritage Guide and the principles set out in the Australia ICOMOS Burra Charter. It has been prepared to an easy-to-use guide to assist MTS staff to quickly understand their obligations in managing historic heritage under the *Heritage Act 1977 (NSW)* which is outlined in Legislative Framework.

This Heritage Management Plan is intended to be used as a first point of reference for the operational maintenance of the heritage assets and heritage listed stations along the M1 Line which fall within the Licensed Maintenance Area. This document is intended to be read in conjunction with relevant site-specific Conservation Management Plans for each station within the Licensed Maintenance Area and relevant guiding documents including Sydney Metro's Unexpected Heritage Finds Procedure (SM-20-00099497).

## Sydney Metro City and SouthWest Area

The Licensed Maintenance Area includes heritage items identified along the Sydney Metro City & Southwest corridor from Chatswood to Bankstown as follows:

*Table 1: Transport Asset Holding Entity and Sydney Metro Heritage items within the Licensed Maintenance Area along the Sydney Metro City & Southwest Corridor*

Station	SHR No. #	LEP No. #	S170 No. #	Licenced Maintenance Area

## Compliance Table

Deed compliance is shown in the below table.

Table 3 Requirements of section 3.41 of Appendix 54 – Project Plan Requirements [SM-CSW-TSOM-SPR-A54-1342]

3.41 Requirements	Comment	Relevant section
a. OpCo2 must develop, implement and maintain a Heritage Management Plan to evidence how the Sydney Metro Heritage Conservation Register will be managed and maintained in accordance with the requirements of the NSW Heritage Act. [SM-CSW-TSOM-SPR-A54-1460]	The S170 Heritage and Conservation Register (under Section 170 of the Heritage Act) is currently being developed by SM. MTS will provide information where required to assist SMA in meeting its obligations under the Heritage Act.	Section 2.3.3 Section 2.3.3 Section 7
b. Heritage Management Plan must include the Conservation Management Plans (CMP) and Conservation Management Strategy (CMS) as noted in Sydney Metro heritage conservation register in Appendix 66. [SM-CSW-TSOM-SPR-A54-1461]	The CMPs and CMSs are being developed and managed by SM. A list of related CMPs and CMSs is appended to this document. The CMPs and CMSs are also referenced in the relevant sections of this document.	Section 3.3 Section 7 Appendix D
c. The Heritage Management Plan must be developed in consultation with NSW Heritage Council (or delegate), local councils and Sydney Trains where relevant. [SM-CSW-TSOM-SPR-A54-1462]	SMA has a Heritage Working Group that includes members of Heritage NSW, the NSW Department of Planning and the Environment and Sydney Trains. Consultation with local councils will be undertaken as part of the implementation phase by MTS as required.	Section 6.4 Section 7
d. The Heritage Management Plan must include all reporting requirements. [SM-CSW-TSOM-SPR-A54-1463]	Internal reporting requirements have been outlined in this HMP. Reporting requirements under the Heritage Act will be a shared responsibility between both MTS and Sydney Metro (SM).	Section 6 Section 7
e. The Heritage Management Plan must include how the exemptions to the NSW Heritage Act will be administered. [SM-CSW-TSOM-SPR-A54-1464]	The standard exemptions and processes for record keeping are outlined in this document.	Section 4.2.2 Standard Exemptions Under Section 75(2) of the Heritage Act 1977 Standard Exemption Record Keeping Form
f. The Heritage Management Plan must be reviewed at least once every 12 months and/or within 28 days of a major noncompliance with the plan that is identified by the Principal or OE&H Heritage Division or NSW Heritage Council issue a complaint, warning letter or notice in respect to management of a Sydney Metro heritage asset. [SM-CSW-TSOM-SPR-A54-1465]	This is addressed in the plan in the noted section.	Section 1.4
g. All deliverables identified in the table below [OpCo2's HMP;	The deliverables are the responsibility of SM, however this HMP is to be managed by MTS	Section 6 Section 7

3.41 Requirements	Comment	Relevant section
Heritage Reports as required under the Act; Audit Reports; Sydney Metro Heritage Management Plan Reports] must be submitted and updated by OpCo2 in accordance with the times set out in this Appendix. [SM-CSW-TSOM-SPR-A54-1466]	Reporting timeframes set by SMA are provided as reporting requirements in this HMP.	
h. The Principal will provide the Conservation Management Plan for all the State Heritage Register (SHR) listed assets after Heritage Council's approval prior to the commencement of Sydney Metro City & Southwest operation. [SM-CSW-TSOM-SPR-A54-1467]	<p>The CMPs and CMSs are being developed and managed by SM. A list of related CMPs and CMSs is appended to this document.</p> <p>The Sydney Metro Heritage Working Group includes members representing Heritage NSW as the delegate authority for the Heritage Council of NSW. As such, this working group can be consulted for CMPs.</p> <p>MTS to create and maintain a Heritage Assets Register in Ellipse.</p>	Section 7 Appendix D Section 6.5
i. The Principal will provide the Conservation Management Strategy for all the SHI listed assets for the management of sites with local significance prior to the commencement of Sydney Metro City & Southwest operation. [SM-CSW-TSOM-SPR-A54-1468]	The CMPs and CMSs are being developed and managed by SM. A list of related CMPs and CMSs is appended to this document.	Section 7 Appendix D
j. The Principal will provide the Listing Application Form after Heritage Council's (or delegate) approval. [SM-CSW-TSOM-SPR-A54-1469]	<p>The management of all listing applications is the responsibility of SM.</p> <p>The Sydney Metro Heritage Working Group with members representing Heritage NSW as the delegate authority for the Heritage Council of NSW can provide this approval.</p>	Section 6.4 Section 7

Table 4 Requirements of Appendix 66 – Heritage Conservation Management [SM-CSW-TSOM-SPR-A54-1342]

Section	Requirement	Comment	Relevant section
<b>1.3 Scope</b>	(i) OpCo2 must prepare a Heritage Management Plan incorporating Sydney Metro's conservation management plan (CMP) and Sydney Metro's conservation management strategy (CMS) as specified in Appendix 54.	The CMPs and CMSs are being developed and managed by SM. A list of related CMPs and CMSs is appended to this document.	Appendix D
	(ii) OpCo2's Operations Activities must comply with the requirements set out in the Act and the requirements specified in this Appendix: <ul style="list-style-type: none"> <li>• NSW State Agency Heritage Guide.</li> <li>• Heritage Management Guidelines.</li> <li>• Heritage Council Guide for Use of Standard Exemptions.</li> <li>• Heritage Council Guide to Conservation Management Plans.</li> </ul>	The requirements in the Heritage Act are set out in the Legislative Requirements section. The State Agency Heritage Guide is appended to this HMP. The other documents are provided as pages on the Heritage NSW website and are referenced in the relevant sections of this report.	Section 2 Section 9 State Agency Heritage Guide
<b>2.1 Heritage Approval Requirements</b>	(i) The heritage approval requirements for OpCo2 are as follows. prepare submissions and obtain all approvals required for OpCo2 Operations Activities in accordance with the Act;	The approval requirements are set out in the HMP, along with a flow chart of processes and the roles and responsibilities set out between MTS and SM.	Section 7
	prepare and obtain approval of Heritage Management Plan that will set out how Sydney Metro heritage sites will be managed in accordance with the requirements of the Act;	This HMP sets out the requirements for management of heritage under the Act and how this will be achieved. The Sydney Metro Heritage Working Group with members representing Heritage NSW as the delegate authority for the Heritage Council of NSW can provide this approval.	Section 2 Section 7 Minimum Standards of Maintenance and Repair (SMCSWTS2-MTS-1NL-HE-REC-002509)
	manage all heritage works in accordance with the requirements of the Act; and	This HMP outlines the statutory requirements, management protocols and roles and responsibilities in managing heritage works within the LMA.	Section 2 Section 7 Minimum Standards of Maintenance and Repair
	engage a suitably qualified heritage conservation manager to provide advice for the management of the heritage assets and preparation of approvals documentation.	The roles and responsibilities section details the division of responsibilities for the management of heritage assets. The requirements for obtaining advice from suitably qualified contractors is also outlined.	Section 3.6 Section 7

Section	Requirement	Comment	Relevant section
<b>2.2 Heritage Approval for New Work</b>	<p>(i) The Act requires approval of new works prior to commencement. OpCo2 must prepare and submit for approval of works that are subject to the provisions of the Act, including but not limited to the following:</p> <p>S60, approval for works within a site curtilage listed on the SHR that are not subject to site specific and/or standard exemptions to the Act.</p> <p>S57 (2), for works subject to exemptions that may require approval of the director of NSW Office Environment and Heritage (OE&amp;H) - Heritage Division [now known as Heritage NSW, part of Department of Planning and Environment].</p> <p>S139, exemptions for excavation works to an area of known or possible archaeological potential located within the Sydney Metro Licenced Maintenance Area.</p> <p>S140, approval for excavation that may disturb a relic; and</p> <p>any application required under the Act related to this Appendix.</p>	<p>The Undertaking Works and Emergency Works sections and roles and responsibilities outlines how approvals and exemptions will be managed within the MTS LMA.</p>	<a href="#">Section 4</a> <a href="#">Section 5</a> <a href="#">Section 7</a>
<b>2.3 Approval for Minor and Regular Maintenance Work</b>	<p>(i) The Heritage Management Plan must identify how OpCo2 will maintain heritage assets to an appropriate standard and unless otherwise exempt, how OpCo2 will manage approval for minor works including the implementation of:</p> <ul style="list-style-type: none"> <li>• standard exemptions;</li> <li>• site specific exemptions;</li> <li>• standard exemption 10; and</li> <li>• exempt works that do not require approval.</li> </ul>	<p>The Undertaking Works and Emergency Works sections and Roles and Responsibilities section outlines how approvals and exemptions will be managed within the MTS LMA.</p>	<a href="#">Section 4</a> <a href="#">Section 5</a> <a href="#">Section 7</a>
<b>2.4 Conservation Management</b>	<p>(i) The Principal will prepare site specific CMP for sites located within the Sydney Metro Licenced Maintenance Area that are listed on the SHR in consultation with OE&amp;H Heritage Division. Each CMP will be endorsed by the Heritage Council.</p> <p>(ii) OpCo2 must review and update the CMP at least once every five years and/or following any works that may alter the significance of heritage elements in the site.</p> <p>(iii) OpCo2 must provide the updated CMPs including</p>	<p>The development and management of CMPs and CMSs within the LMA is the responsibility of SM. The CMPs and relevant management conditions of the CMPs as they relate to assets within the MTS LMA are referred to in this document in the relevant sections.</p>	<a href="#">Section 3.3</a> <a href="#">Appendix D</a>

Section	Requirement	Comment	Relevant section
	<p>administration of endorsement by the Heritage Council.</p> <p>(iv) OpCo2 must manage SHR sites using the respective CMPs and in accordance with OpCo2's Heritage Management Plan.</p> <p>(v) The Principal will prepare a conservation management strategy for all sites that are listed on the TfNSW section 170 register (excluding SHR listings) in accordance with the relevant standards and guidelines published by OE&amp;H Heritage Division, Heritage Council and good industry practice.</p> <p>(vi) OpCo2 must review and update the CMS at least once every five years and/or updated following any works that may alter the significance of heritage elements in the site.</p>		
<b>3. Reporting</b>	<p>OpCo2 must prepare and submit all notifications and reports required under the Act with respect to the items listed on the Heritage Conservation Register.</p> <p>The Act contains annual reporting provisions which increase the accountability of state agencies to the community for responsible management of their heritage assets. The annual report for the Sydney Metro must be prepared by OpCo2 for both SHR and s170 listed sites and must include:</p> <ul style="list-style-type: none"> <li>a) demonstration that the principles and guidelines have been adopted as part of the management strategy of heritage assets.</li> <li>b) a statement on the condition of the items listed on the agency's heritage and conservation register and the SHR.</li> <li>c) a register of all works, including scheduled maintenance, completed within the previous 12 months; and</li> <li>d) a register of all correspondence received and issued in respect to management of the heritage assets.</li> </ul> <p>OpCo2 must provide copies of all draft reports to the Principal not less than 14 working days prior to presenting to the Heritage Council.</p> <p>OpCo2 must directly submit the reports, which have been</p>	<p>This responsibility is vested with SMA for the heritage assets within the LMA, however MTS's obligations and contribution to the reporting requirements is provided in this HMP.</p> <p>MTS to create and maintain a Heritage Assets Register in Ellipse.</p>	<a href="#">Section 6</a> <a href="#">Section 7</a>

Section	Requirement	Comment	Relevant section
	<p>endorsed by TfNSW, to the Heritage Council.</p> <p>In addition to the above annual reporting requirements, OpCo2 must immediately notify, and provide copies to the Principal of any correspondence relating to notices of breach, notice of potential breach, warning notice and any other correspondence that is issued by NSW Heritage Council (or its delegates) in respect to any items, assets and land that is located with the Licensed Maintenance Area.</p> <p>If required at any time, OpCo2 must prepare S170A notifications in consultation with TfNSW and submit to the Principal not less than 28 days prior to removing, transferring or ceasing to occupy any asset on the Heritage and Conservation Register in accordance with s170A of the Act.</p> <p>The Principal will issue the notification to OE&amp;H Heritage Division, on behalf of the asset owner not less than 14 days prior to OpCo2 removing, transferring or ceasing to occupy.</p>		
<b>4. Heritage Conservation Management</b>	<p>i) OpCo2 must engage a suitably qualified and experienced heritage conservation manager to: prepare, maintain and implement OpCo2's Heritage Management Plan.</p> <p>carry out all works within any SHR site, including works covered by either standard exceptions and or rail/ site specific exemptions, that will have a minor (or greater) heritage impact.</p> <p>approvals required under the Act (including works administered under an exemption); and</p> <p>execution of any works that are subject to approval under the Act, including scheduled maintenance works that are subject to the Act.</p> <p>(ii) The Principal's approval is required prior to engagement of the heritage conservation manager, and the approval will be subject to provision of satisfactory evidence of suitable qualifications by OpCo2.</p> <p>(iii) Archaeologists, if required, may be engaged on a need basis, but will be subject to TfNSW and the Heritage Council's approval.</p>	<p>The roles and responsibilities are set out in this HMP. There are also policies relating to engaging suitably qualified professionals for contracted works within the MTS LMA.</p>	<a href="#">Section 3.6</a> <a href="#">Section 7</a>

Section	Requirement	Comment	Relevant section
<b>5. Maintenance Requirements</b>	<p>5.1 Minimum Standards for Maintenance of Heritage Assets</p> <p>(i) OpCo2 must maintain the heritage assets and must comply with the requirements of the Act, including s170, s118-122 of the Act that sets out the conditions relating to minimum standards for maintenance and repair of SHR listed sites.</p> <p>(ii) OpCo2 must comply with the requirements in section 3 of the Act that sets out the requirements for approval of works.</p> <p>(iii) OpCo2 must comply with the requirements of the Act that includes provisions relating to maintenance of state-owned heritage assets listed on heritage and conservation registers. These include:</p> <p>state-owned heritage management principles; and</p> <p>section 170A (2) of the Act requiring that the state agencies manage items on their heritage and conservation registers with due diligence in accordance with the principles approved by the Minister, on the advice of the Heritage Council.</p> <p>(iv) The following documents set out the maintenance requirements for the Sydney Metro heritage conservation area:</p> <ul style="list-style-type: none"> <li>• OpCo2's Heritage Management Plan.</li> <li>• relevant sections of the CMPs and CMS.</li> <li>• NSW state agency heritage guide.</li> <li>• The Act; and</li> <li>• Heritage Conservation Register.</li> </ul>	The Minimum Standards for Maintenance of Heritage Assets is set out in this HMP. A list of related documents is provided in the Appendix.	<a href="#">Section 3.2</a> <a href="#">Appendix D</a> <a href="#">Minimum Standards of Maintenance and Repair</a>
<b>6. Schedule of Heritage Assets</b>	6.1 Heritage Conservation Register [in SPR] sets out CMP/CMS and reporting requirements for heritage listed sites for Sydney Metro City & Southwest.	The Schedule of Heritage Assets, including reporting requirements, has been incorporated into the list of heritage items identified along the SMC&SW corridor from Central Station to Bankstown.	Appendix F.

# 1. Introduction

Metro Trains Sydney (MTS) is the Operator and Maintainer of the M1 line under the OTS2 Deed.

The Heritage Management Plan (HMP) has been designed to meet the deed Scope and Performance Requirements to maintain the heritage assets within the MTS Licensed Maintenance Area (LMA) for the Sydney Metro City & Southwest line in accordance with the *Heritage Act 1977 (NSW)*.

This HMP has been prepared as a user-friendly document which explains how the heritage will be managed during operations and outlines the requirements of all applicable heritage management guidelines and standards including the Heritage Council of NSW's guidelines.

This HMP is intended to be a live document and will be subject to revision as the project progresses.

## 1.1. SMCSW area

The SMCSW project includes a new 30-kilometre metro line extending metro rail from the end of SMNW at Chatswood, under Sydney Harbour, through new CBD stations and southwest to Bankstown. The project (Critical State Significant Infrastructure (CSSI) project no. SSI 8256 and SSI 15\_7400), approved in 2018 and due to open in 2026, involves the conversion of train stations along the Chatswood to Sydenham line and Sydenham to Bankstown line from railway stations into metro/rail interchange stations. The following stations have been converted as part of the works, many of which have heritage listings at the state or local level and are listed on the Sydney Metro s170 heritage asset register.

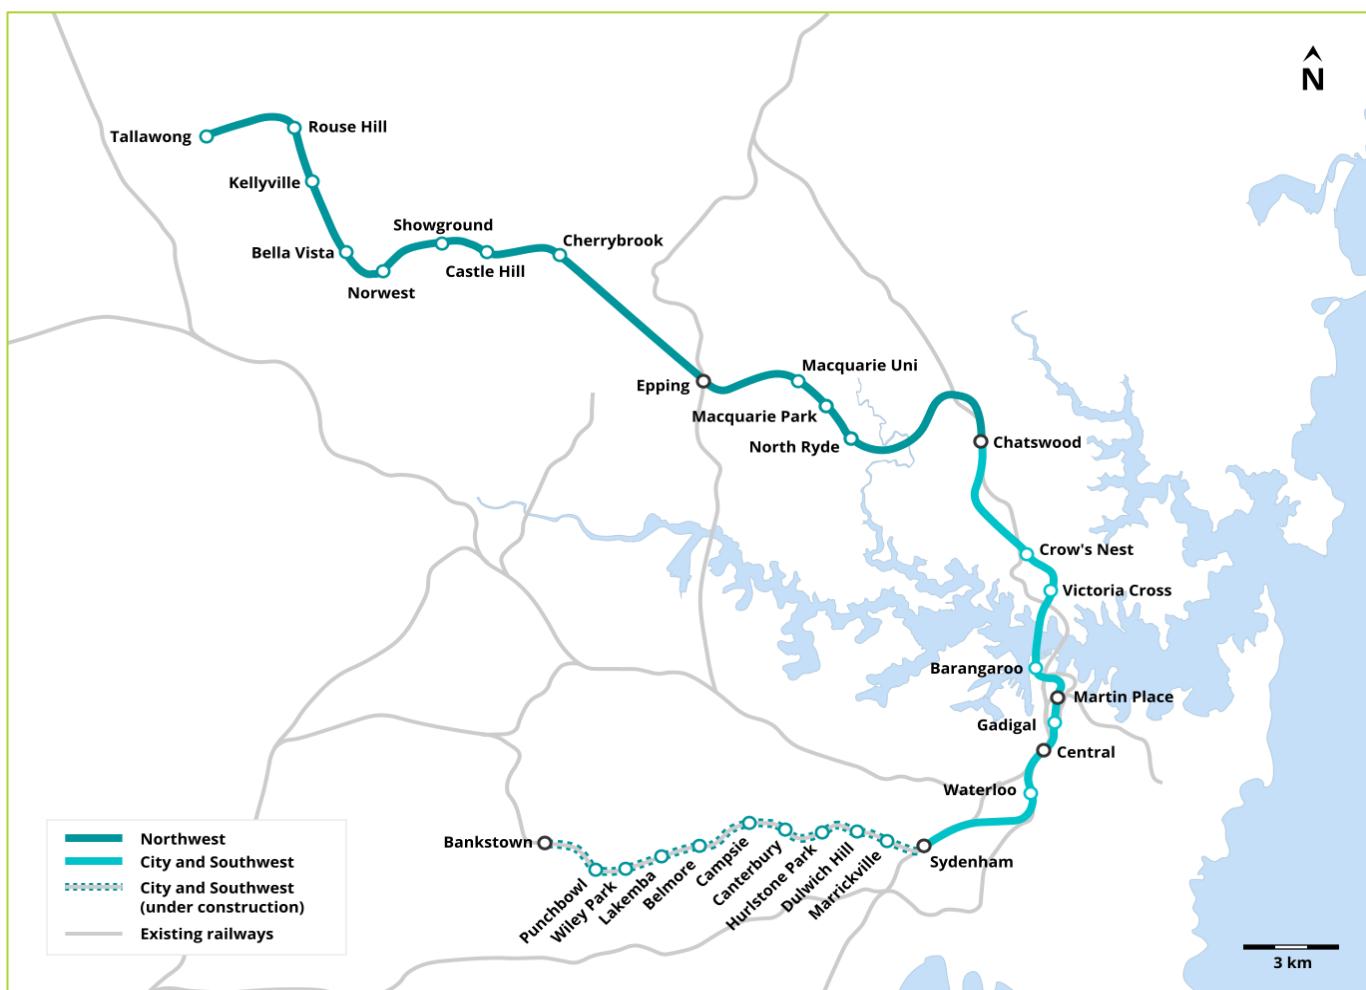

### 1.1.1. Stations and heritage items in the SMCSW Area

The Licensed Maintenance Area includes heritage items identified along the Sydney Metro City & Southwest corridor from Chatswood to Bankstown. These items have been identified in Table 1.

The SMCSW project area and MTS Licensed LMA also includes several heritage items and heritage conservation areas which are not Sydney Metro assets and located outside the train station groups. These items have been identified in Table 2.

The following figures show the location of the stations and heritage items along the Sydney Metro City and Southwest corridor.

Figure 1 Sydney Metro Alignment Map (Source: Sydney Metro)

**Figure 2 Location of Metro Stations in the Chatswood to Sydenham Line (Source: Artefact, 2024)**

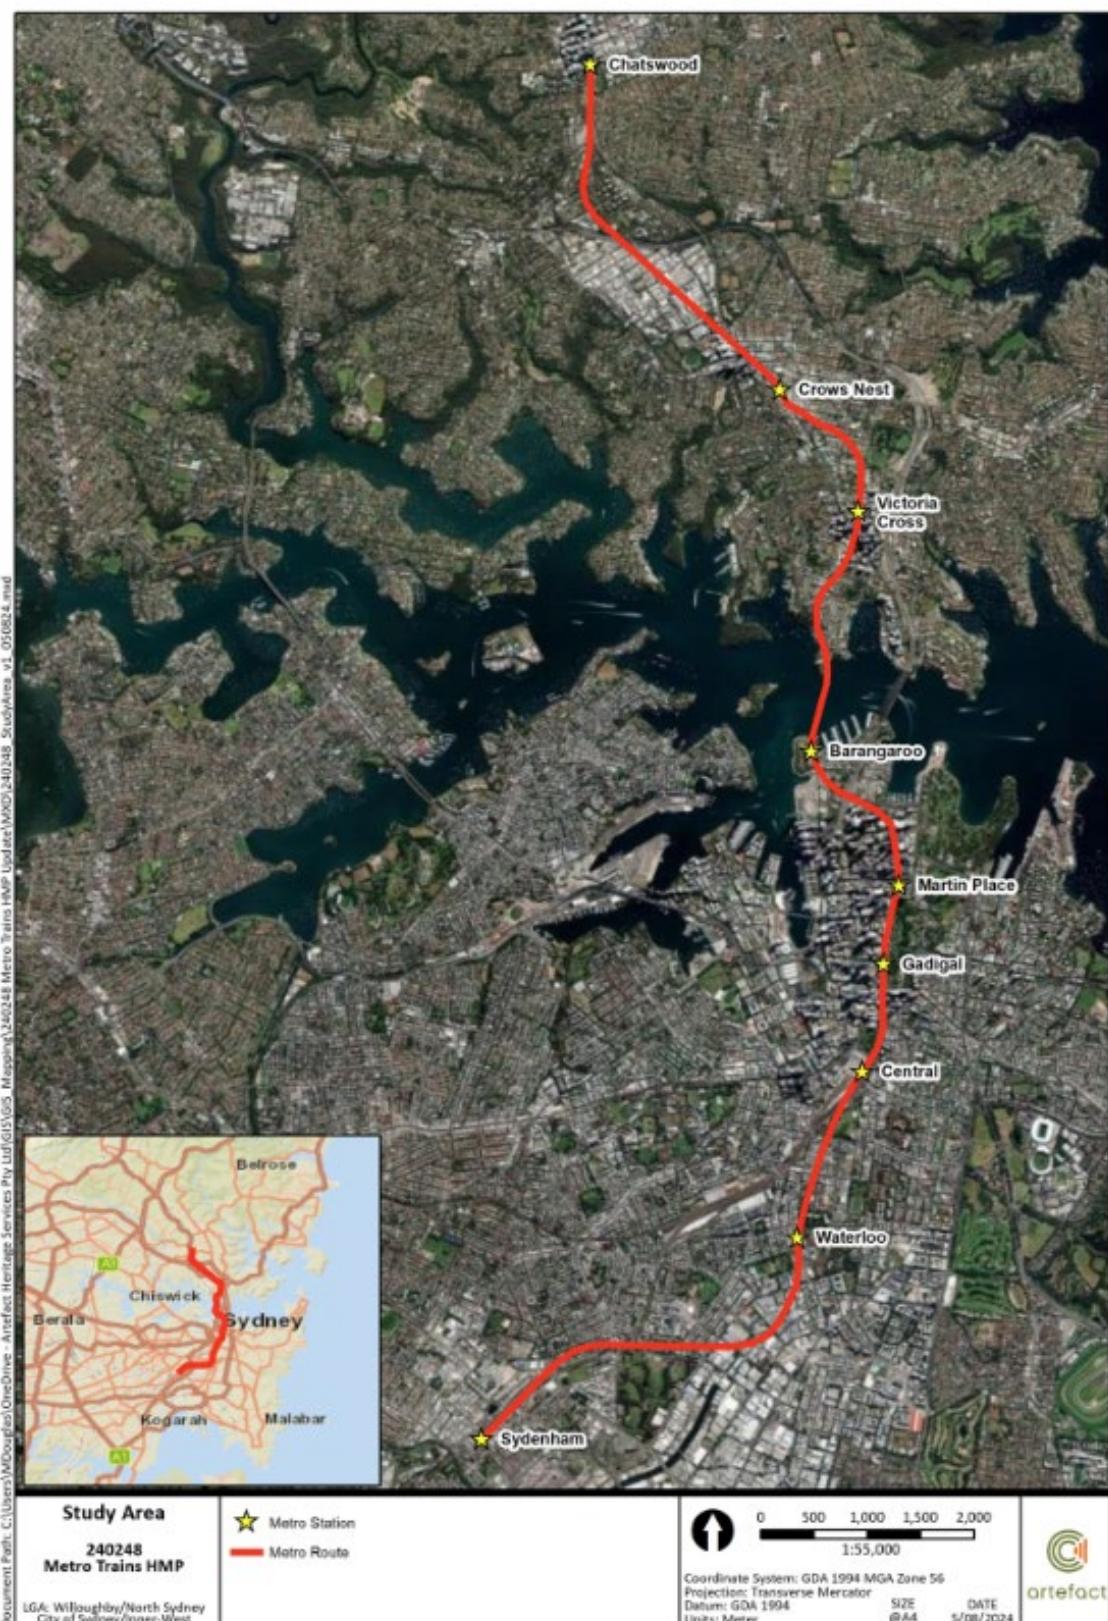

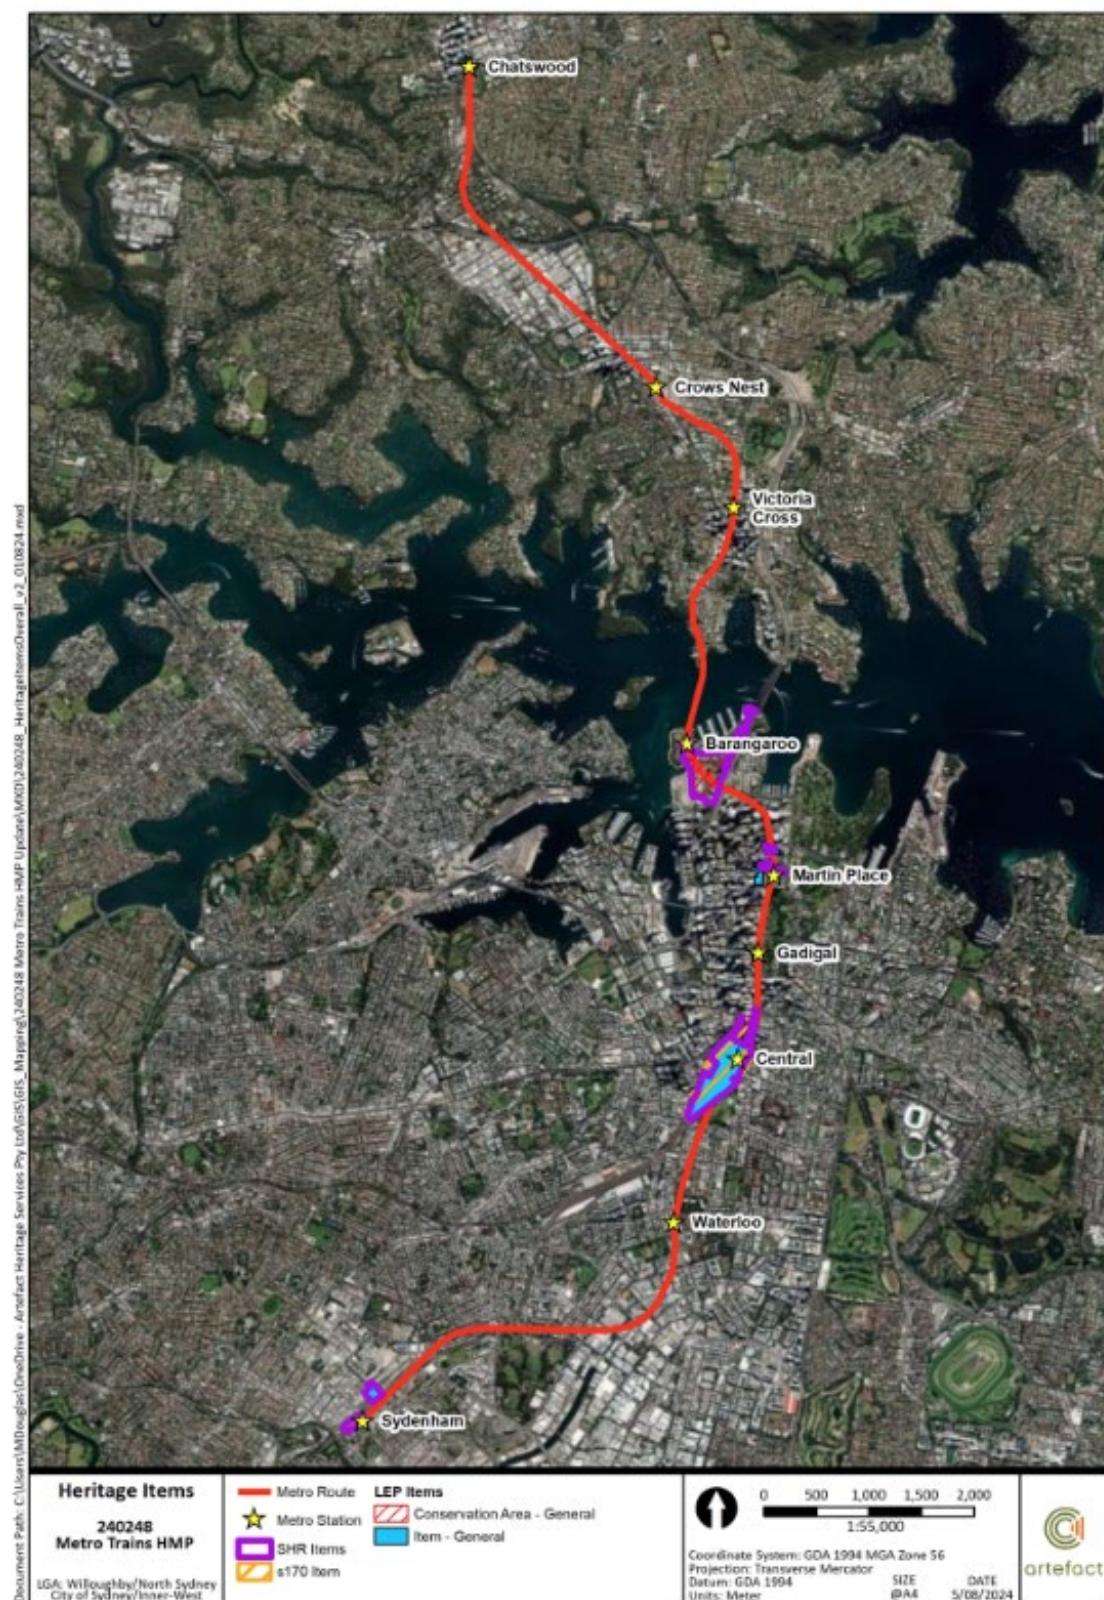

Figure 3: Heritage Items along the Chatswood to Sydenham Line (Source: Artefact, 2024)

## 1.1.2. MTS Licensed Maintenance Area

This HMP refers to the heritage assets within the LMA only. Currently, this HMP includes the complete LMA for the Chatswood to Sydenham LMA and part of the Sydenham to Bankstown LMA as follows.

### Chatswood to Sydenham line

- Chatswood Station
- Crows Nest Station
- Victoria Cross Station
- Barangaroo Station
- Martin Place
- Gadigal Station
- Central Station
- Waterloo Station

### Sydenham to Bankstown line

- Sydenham Station

The maps showing individual station LMAs are included in Appendices A and B.

## 1.2. Purpose of this HMP

The purpose of the HMP is to outline how MTS manages heritage and archaeological assets across the M1 Line operated and maintained by MTS and provides best practice heritage management policies and actions that should be applied network wide. More specifically, this HMP identifies the heritage management process for the Operations and Maintenance (O&M) Phase of the OTS2 PPP. This document provides:

- Reference to requirements for compliance with the Heritage Act for all state listed buildings and sites that are located within MTS LMA, all heritage sites listed on the Sydney Metro Section 170 Heritage and Conservation Register, and archaeological resources located within the MTS LMA.
- Reference to the guidelines and standards for managing heritage places set out by the NSW Department of Climate Change, Energy, Environment and Water (DCCEEW NSW), Heritage NSW and the Heritage Council of NSW.
- Reference to Sydney Metro plans and strategies relating to the management of historic heritage.
- Reference to the management of Aboriginal cultural heritage and archaeology.

## 1.3. Scope and objectives

The scope of this HMP is to manage all heritage assets in MTS's LMA which includes built heritage, historical and Aboriginal archaeology and landscapes. It primarily covers all areas where physical maintenance and other works will occur and is applicable for the duration of the line operations.

All MTS staff, including subcontractors engaged to carry out physical works are required to comply with this HMP.

The objectives of this HMP are to:

- Describe how heritage assets within the MTS LMA will be maintained in accordance with the minimum standards of maintenance and repair.
- Provide detailed management policies as outlined in site specific conservation management plans (CMP) and conservation management strategies (CMS)
- Include all reporting requirements.
- Include how the exemptions to the NSW Heritage Act will be administered.
- Include the requirements for reviews and updates.
- Be developed in consultation with Sydney Trains and other government bodies such as NSW Heritage Council (or delegate) and/or local councils, where relevant

- Ensure that potential heritage impacts are identified and appropriately minimised or avoided.
- Ensure that contractors are fully aware of the area's Aboriginal heritage values and historical and Aboriginal archaeological resources.

## 1.4. Update and ongoing development of HMP

This plan is governed by clause 8 of OTS2 deed, as well as:

- Exhibit 1, Appendix 66 Heritage Conservation Management; and
- Exhibit 1, Appendix 54 Project Plan Requirements, 3.41 Heritage Management Plan.

This plan is updated in accordance with these deed requirements.

Also, as per OTS2 Exhibit 1, Appendix 54 Project Plan Requirements, Section 2, Table 1, MTS must provide the Heritage Management Plan 120 days prior to commencement of Trial Running. That applied to Phase 1 expansion to city and will also apply to Phase 2 expansion to Bankstown. In addition, MTS must update this plan annually and/or within 28 days of a major non-compliance.

Note: Metro is in the process of completing the CMP and CMSs for the Southwest stations. The HMP at the date of this document is the most up to date version. Upon receipt of the remaining CMPs and CMSs, the HMP will be updated.

This HMP should be reviewed within 28 days of a major non-compliance with the plan that is identified by Sydney Metro or when NSW Heritage Council issues a complaint, warning letter or notice in respect to management of a Sydney Metro heritage asset, or as required due to changes to contract/s, legislation and/or business activities.

The MTS Environment & Sustainability Lead is responsible for ensuring the HMP is maintained and reviewed in accordance with business practices and standards to accurately reflect changes to the working environment and will ensure changes are carried out in a planned manner and with consideration to the following.

- The purpose of change and its potential consequence.
- The integrity of the Strategic Business Plan.
- Availability of resources.
- Allocation of responsibilities and authorities.

Changes should be made as soon as reasonably possible to the HMP, subject to the requirement.

## 1.5. The OTS PPP and OTS2

Sydney Metro (the Principal) engaged NRT Pty Ltd (OpCo) and NRT CSW Pty Ltd (OpCo2) to deliver the Sydney Metro Northwest (SMNW) and Sydney Metro City and Southwest (SMCSW) Public Private Partnership (PPP) contracts, respectively.

These two PPP contracts were awarded by government effectively as 'packages,' each comprising three separate main entities, OpCo or OpCo2 plus two Core Contractors, each including three distinct roles:

- SMNW PPP (OTS), comprising OpCo (finance), the D&C Contractor (delivery) and the O&M Contractor ('MTS') (operations & maintenance);
- SMCSW PPP (OTS2): OpCo2 (finance), the Integrator (delivery) and MTS (operations & maintenance).

The delivery and the operations & maintenance obligations are 'passed down' virtually in their entirety to the relevant Core Contractor (e.g. to MTS, under the OTS and OTS2 O&M Contracts). SPR obligations of OpCo / OpCo2 are Core Contractor obligations. Accordingly, operation and maintenance obligations of OpCo and OpCo2 for OTS and OTS2 are obligations of MTS.

OTS and OTS2 were two separate and distinct PPP contracts. They have 'merged' together at the Incorporation Date in November 2024 (completion of OTS2 Phase 1, City section), from an operations and maintenance perspective, becoming a single operating railway under a single PPP contract (i.e. OTS2), with MTS responsible for all operations and maintenance obligations.

## 2. Legislative Framework

This section discusses the heritage management framework, notably legislative and policy context, applicable to the proposed development and study area.

### 2.1. Identification of heritage listed items

Heritage listed items were identified through a search of relevant state and federal statutory and non-statutory heritage registers:

- World Heritage List
- Commonwealth Heritage List
- National Heritage List
- National Parks and Wildlife Act 1974
- State Heritage Register
- Section 170 Heritage and Conservation Registers
- NSW State Heritage Inventory database
- Sydney Local Environmental Plan (2012)
- Inner West LEP 2022
- Canterbury Bankstown LEP 2023
- National Trust of Australia (NSW) Register.

Items listed on these registers have previously been assessed against the heritage assessment guidelines relevant to their peak governing body. Items that are of Commonwealth, National and World heritage significance have been assessed in accordance with the *Environmental Protection and Biodiversity Conservation Act 1999* (the EPBC Act). Items of state or local significance have been assessed against the NSW Heritage Assessment guidelines. Assessments of heritage significance as they appear in relevant heritage inventory sheets and documents, are provided in this assessment.

There are several items of legislation that are relevant to the LMA. A summary of the relevant Acts and the potential legislative implications are provided below.

There are no items which are located on the World Heritage List (WHL), Commonwealth Heritage List (CHL) or National Heritage List (NHL) within the LMA.

### 2.2. National Parks and Wildlife Act 1974

The *National Parks and Wildlife Act 1974* (NP&W Act), administered by Heritage NSW, Department of Climate Change, Energy, the Environment and Water (DCCEEW) provides statutory protection for all Aboriginal 'objects' (consisting of any material evidence of the Aboriginal occupation of NSW), and for 'Aboriginal Places' (areas of cultural significance to the Aboriginal community).

The protection provided to Aboriginal objects applies irrespective of the level of their significance or issues of land tenure. However, areas are only gazetted as Aboriginal places if the Minister is satisfied that sufficient evidence exists to demonstrate that the location was and/or is of special significance to Aboriginal culture.

All Aboriginal objects, whether recorded or not, are protected under the NPW Act.

Section 86 of the NPW Act identifies that it is an offence to harm or desecrate an Aboriginal object and/or an Aboriginal place. Section 86 outlines penalty units applicable where it is identified that a person or corporation is in breach of Section 86.

The NPW Act defines harm to an object or place as any act or omission that:

- (a) destroys, defaces or damages the object or place, or
- (b) in relation to an object moves the object from the land on which it had been situated, or

- (c) is specified by the regulations, or
- (d) causes or permits the object or place to be harmed in a manner referred to in paragraph (a), (b) or (c)

The penalties and fines for damaging or defacing an Aboriginal object were increased in 2010.

## 2.3. Heritage Act 1977

The Heritage Act provides protection for items of 'environmental heritage' in NSW. 'Environmental heritage' includes places, buildings, works, relics, movable objects or precincts considered significant based on historical, scientific, cultural, social, archaeological, architectural, natural or aesthetic values. Items considered to be significant to the State are listed on the SHR and cannot be demolished, altered, moved or damaged, or their significance altered without approval from the Heritage Council of NSW.

### 2.3.1. State Heritage Register

The State Heritage Register (SHR) was established under Section 22 of the Heritage Act and is a list of places and objects of particular importance to the people of NSW, including archaeological sites. The SHR is administered by Heritage NSW, and includes a diverse range of over 1,500 items, in both private and public ownership. To be listed, an item must be deemed to be of heritage significance for the whole of NSW. For works to an SHR item, a Section 60 application must be prepared for works that are not exempt under Section 57(2) of the Heritage Act.

See Table 1 of this report for the items registered on the SHR within the LMA.

### 2.3.2. Archaeological relics

Part 6 Division 9 of the Heritage Act protects archaeological 'relics' from being 'exposed, moved, damaged or destroyed' by the disturbance or excavation of land. This protection extends to the situation where a person has 'reasonable cause to suspect' that archaeological remains may be affected by the disturbance or excavation of the land. It applies to all land in NSW that is not included in the SHR.

Section 139 of the Heritage Act requires any person who knows or has reasonable cause to suspect that their proposed works will expose or disturb a 'relic' to first obtain an excavation permit from the Heritage NSW (pursuant to Section 140) unless there is an applicable exception (pursuant to Section 139(4)). In cases where a Section 139 permit is not required for projects assessed under Part 5.1 of the EP&A Act, works would need to be conducted in accordance with the intent of the Heritage Act.

Section 146 of the Heritage Act requires any person who is aware or believes that they have discovered or located a relic must notify Heritage NSW providing details of the location and other information required. This notification can be done via the Heritage Management System.

### 2.3.3. Section 170 register

Under the Heritage Act all government agencies are required to identify, conserve and manage heritage items in their ownership or control. Section 170 (s170) requires all government agencies to maintain a Heritage and Conservation Register that lists all heritage assets and an assessment of the significance of each asset. They must also ensure that all items inscribed on its list are maintained with due diligence in accordance with State Owned Heritage Management Principles approved by the Government on advice of the NSW Heritage Council. These principles serve to protect and conserve the heritage significance of items and are based on NSW heritage legislation and guidelines.

A number of the items listed on the TAHE s170 will be transferred to the Sydney Metro s170 Heritage and Conservation Register.

See Section Table 1 of this report for the items listed on s170s within the study area.

## 2.4. State Environmental Planning Policy (Transport and Infrastructure) 2021

*State Environmental Planning Policy (Transport and Infrastructure) 2021* (the Transport and Infrastructure SEPP) aims to facilitate the effective delivery of transport and infrastructure across NSW. The Transport and Infrastructure SEPP assists local government, the NSW Government and the communities they support, by simplifying the process for providing essential infrastructure in areas such as education, hospitals, roads and railways, emergency services, water supply and electricity delivery.

Generally, where there is conflict between the provisions of the TISEPP and other environmental planning instruments, the TISEPP prevails. While the TISEPP overrides the controls included in the LEPs and Development Control Plans (DCPs), the proponent is required to consult with the relevant local councils when development “is likely to have an impact that is not minor or inconsequential on a local heritage item (other than a local heritage item that is also a State heritage item) or a heritage conservation area”.

When this is the case, the proponent must not carry out such development until it has (TISEPP 2021 Clause 2.11.2):

- (a) had an assessment of the impact prepared, and
- (b) given written notice of the intention to carry out the development, with a copy of the assessment and a scope of works, to the council for the area in which the heritage item or heritage conservation area (or the relevant part of such an area) is located, and
- (c) taken into consideration any response to the notice that is received from the council within 21 days after the notice is given.

## 2.5. Environmental Planning and Assessment Act 1979 (NSW)

The EP&A Act establishes the framework for cultural heritage values to be formally assessed in the land use planning and development consent process. The EP&A Act requires that environmental impacts are considered prior to land development; this includes impacts on cultural heritage items and places as well as archaeological sites and deposits.

The EP&A Act also requires that local governments prepare planning instruments (such as Local Environmental Plans and Development Control Plans [DCPs]) in accordance with the EP&A Act to provide guidance on the level of environmental assessment required. The study area falls within the boundaries of the Sydney and Inner West local government areas. Schedule 5 of each of the *Sydney Local Environmental Plan 2012* (LEP) and *Inner West LEP 2022* includes a list of items/sites of heritage significance within this LGA.

### 2.5.1. Local Environmental Plans

#### 2.5.1.1. Willoughby LEP 2012

The Willoughby LEP 2012 applies to the Willoughby LGA. There are no heritage items registered in the Willoughby LEP 2012 within the LMA.

#### 2.5.1.2. North Sydney LEP 2013

The North Sydney LEP 2013 applies to the North Sydney LGA. There are no heritage items registered in the North Sydney LEP 2013 within the LMA.

#### 2.5.1.3. Sydney LEP 2012

The Sydney LEP 2012 applies to the City of Sydney LGA. See Table 1 of this report for the items registered in the Sydney LEP 2012 within the LMA.

#### 2.5.1.4. Inner West LEP 2022

---

The Inner West LEP 2022 applies to the Inner West LGA, which merged the former Leichhardt, Ashfield and Marrickville LGAs. See Table 1 of this report for the items registered in the Inner West LEP 2022 within the LMA.

### 2.5.1.5. Canterbury Bankstown LEP 2023

The Canterbury Bankstown LEP 2023 applies to the Canterbury Bankstown LGA, which merged the former Canterbury and Bankstown LGAs. See Table 1 of this report for the items registered in the Canterbury Bankstown LEP 2023 within the LMA.

## 2.6. Non-statutory Listings

### 2.6.1. National Trust of Australia (NSW) Register

The National Trust (NSW) Register lists buildings and items of heritage significance in NSW. Listing by the National Trust of Australia (NSW) does not impose any statutory requirements on the site or its components though the organisation is an influential force regarding environmental matters in the state. Inclusion on the National Trust Register generally indicates a high level of community support. Listing on this register prompts responsible authorities and property owners to respond appropriately and enhances public awareness.

Of the items in the LMA, Central Railway Station and Sydenham Railway Station have National Trust listings.

## 3. Managing heritage

### 3.1. Introduction

The following outlines MTS' responsibilities in relation the management and maintenance of heritage assets within the LMA. This should be used as a guide and first point of contact, but where relevant should be read in conjunction with station specific conservation management plans and strategies and related documents.

### 3.2. Minimum standards of maintenance and repair

MTS is required to maintain all heritage assets to a minimum standard of maintenance and repair. Items on the SHR and Section 170 Heritage and Conservation Register are subject to minimum standards of maintenance under the Heritage Act and are set out in Part 3 of the Heritage Regulations 2012.

The *Minimum Standards of Maintenance and Repair of Heritage Items* (sets out the requirements for this).

The minimum standards aim to prevent serious or irreparable damage or deterioration of a heritage item.

The standards are based on good property management practices to:

- avoid putting off maintenance which can cause serious damage or deterioration and become very expensive;
- ensure the values of the heritage item are protected.

The minimum standards require owners to:

- ensure protection against damage or deterioration due to weather;
- ensure a reasonable level of protection against damage or destruction by fire, including additional fire protection for unoccupied buildings;
- provide security, including additional security measures for unoccupied buildings;
- do essential maintenance and repairs to prevent serious or irreparable damage or deterioration;
- arrange regular inspections;
- provide inspection reports to the Heritage Council of NSW when needed or asked;
- follow specific standards for ruins and moveable objects.

The Heritage Regulation 2012 does not require owners to do extra work as long as the minimum standards of maintenance and repair are achieved.

If a property owner or manager does not meet the minimum standards of maintenance and repair for the heritage item in their care, this may lead to actions outlined in section 120 of the Heritage Act.

Owners of SHR listed items, or items subject to an interim heritage order, may be eligible to apply for heritage grants to assist with developing management documents, and doing maintenance and restoration works.

These are outlined on the Heritage NSW website and provided in Minimum Standards of Maintenance and Repair.

<https://www.environment.nsw.gov.au/topics/heritage/manage-heritage-items/minimum-standards-maintenance-repair-for-heritage-items>

#### 3.2.1. Technical heritage maintenance guidelines

To assist in the management and maintenance of heritage assets, Heritage NSW has prepared a series of Technical Heritage Maintenance Guidelines which contain best practice guidelines for the conservation, repair and use of heritage assets. They are split into the following categories.

- Building repairs and conservation.
- Climate change preparedness.
- Fire and access in buildings.

- General maintenance.
- Renovating, adaptive reuse and infill development.

<https://www.environment.nsw.gov.au/topics/heritage/manage-heritage-items/heritage-maintenance-guides>

Table 5 Actions for managing heritage assets in accordance with the minimum standards.

	Actions	Timing
<b>1 Minimum standards of maintenance and repair</b>	1.1 MTS will undertake a dilapidations survey of all heritage assets in the LMA to establish the condition of the fabric to inform development of the Cyclical Maintenance Plans. The inspections will be completed by suitably qualified and experienced heritage specialists.	On asset handover.
	1.2 Preparation of Cyclical Maintenance Plans for each heritage asset within the LMA.	Following dilapidation survey.
	1.3 Cyclical inspections of assets based on Cyclical Maintenance Plan. The inspection should be completed by suitably qualified and experienced heritage specialists.	As per timings stipulated in the Cyclical Maintenance Plans.
	1.4 Preparation of a prioritised list of maintenance and repairs required to maintain the asset.	As required.
	1.5 Undertake restoration/maintenance/cleaning works as per prioritised list of maintenance. The inspection should be completed by suitably qualified and experienced specialists.	As required, per timings stipulated in the prioritised list of maintenance.
<b>2 Technical heritage maintenance guidelines</b>	2.1 MTS should ensure that the technical guides for conserving, repairing and using heritage items are followed in all works and maintenance activities for heritage assets.	Always.

### 3.3. Conservation Management Plans, Strategies and Other Guiding Documents

In addition to the *Minimum Standards of Maintenance and Repair*, CMPs and CMSs have been prepared or are in preparation for all listed stations between Sydenham and Bankstown. These documents include specific policies and guidelines for managing individual assets.

These CMPs, CMSs and other guiding documents should be read in conjunction with this HMP and where appropriate would supersede the advice of this HMP.

The CMPs, CMSs and other guiding documents for each of the heritage listed items within the LMA from Chatswood to Bankstown are outlined in the table below.

Sydney Metro is preparing conservation management plans and strategies for all SHR listed stations and stations of local heritage significance on its Heritage and Conservation Register between Sydenham and Bankstown in accordance with the planning approval SSI 8256. Once complete, MTS will be responsible for managing heritage items in accordance with the plans and strategies.

Table 6 Heritage Asset Conservation Management Plans, Strategies and Other Guiding Documents

Item	Conservation Management Plan/Strategy	Other Guiding Documents
<b>Chatswood to Sydenham Line</b>

<b>Punchbowl Railway Station Group</b>	<ul style="list-style-type: none"> <li>In preparation</li> </ul>	
<b>Bankstown Railway Station Group</b>	<ul style="list-style-type: none"> <li>In preparation</li> </ul>	

Table 7 Actions for managing heritage assets in accordance with CMPs and CMSs

	Actions	Timing
<b>3 Conservation management plans and strategies</b>	3.1 Heritage assets will be managed in accordance with CMPs or CMSs where applicable.	On completion of CMP or CMS

Some LMAs intersect with other heritage items which are of State or Local heritage significance. Whilst works within the LMA are unlikely to impact these heritage items, outlined below are the relevant CMPs, CMS or other guiding heritage documents for each of these heritage items, which should be consulted and guide any future development or works within the LMA which may impact the heritage items.

Table 8 Conservation Management Plans and other guiding documents for heritage items which are not TAHE or Sydney Metro assets but are located within LMAs.

### 3.4. Monitoring and auditing

As part of the management and maintenance of heritage assets, a regular system of monitoring and auditing of the assets should be undertaken. This will enable MTS to maintain the condition of heritage assets to the minimum standard required under the Heritage Act. A monitoring and audit program will also enable planning for current and future costs associated with maintaining heritage assets and to program an efficient periodic maintenance works schedule of targeted and appropriate repair and maintenance works.

The Minimum Standards of Maintenance and Repair under the Heritage Act and the relevant CMPs and CMSs should be incorporated into the schedule of maintenance and repair work. The specific policies from relevant

CMPs, CMSs and other guiding documents (as per Section 3.3) should be referenced into the schedules and the item below.

*Table 9 Actions for maintaining assets in accordance with Minimum Standards of Maintenance and Repair*

Management area	Actions	Timing
<b>1. Monitoring and auditing</b>	1.1 Establish an audit program to check compliance with Cyclical Maintenance Plans and requirements of Minimum Standards of Maintenance and Repair. The inspection should be completed by suitably qualified and experienced heritage specialists.	Yearly
	1.2 MTS should provide technical review and quality assurance of heritage specialist advice.	As required

## 3.5. Archaeology

Locations that have been assessed as having historical archaeological potential or known archaeological remains will be managed in accordance with a site-specific CMP and its policies that may include archaeological monitoring and recording, salvage excavations or management under Sydney Metro's Unexpected Heritage Finds Procedure. If ground disturbance work is required in an area of historical archaeological potential, MTS should engage with a suitably qualified archaeologist to assess the potential impact of the work.

With respect to the management of Aboriginal heritage and archaeology previous assessments and investigation undertaken as part of the project, have demonstrated that the project area is unlikely to produce to contain Aboriginal objects other than at Central Station. Impacts to Aboriginal heritage at Central Station will be managed in accordance with a site-specific CMP, unexpected finds other than at Central Station which has an identified PAD, will be managed in accordance with the Sydney Metro Unexpected Heritage Finds Procedure.

*Table 10 Actions for managing archaeology.*

	Actions	Timing
<b>4 Aboriginal objects and places</b>	4.1 Impact to areas of known Aboriginal archaeological potential at Central Station and Belmore Station will be avoided during operations.	Operations
	4.2 If ground disturbing work is proposed within the area of Aboriginal archaeological potential at Central Station or Belmore Station, it will be managed in accordance with the station specific conservation management plan and the National Parks and Wildlife Act 1974, with advice from a suitably qualified and experienced archaeologist.	During ground disturbing works
<b>5 Relics</b>	5.1 Impact to archaeological relics will be avoided during operations.	Operations
	5.2 If ground disturbing work is required in areas with known historical archaeological relics or areas of historical archaeological potential, it will be carried out in accordance with the station specific conservation management plan and the Heritage Act 1977, with advice from a suitably qualified and experienced archaeologist.	During ground disturbing works
<b>6 Unexpected finds</b>	6.1 The Sydney Metro Unexpected Heritage Finds Procedure will be followed.	Always

## 3.6. Engaging suitably qualified contractors and specialists

The Heritage Act and *State Agency Heritage Guide* refer to the engagement of suitably qualified and experienced heritage contractors and practitioners. This includes the engagement of all contractors to undertake exempt activities, activities with a permit, and general maintenance activities, as well as the engagement of heritage consultants and archaeologists.

The Heritage NSW website maintains a heritage consultants directory and a list of professional organisations that have members with recognised specialist heritage experience. While inclusion on the directory is not a recommendation or endorsement by Heritage NSW or the Heritage Council, the database provides a guide of potential contractors who have knowledge and experience of working with heritage listed places and assets.

Heritage specialists may include heritage consultants, heritage architects, structural engineers who specialise in heritage buildings, cultural materials conservators and archaeologists. The type of specialist will depend on the type of work proposed.

<https://www.environment.nsw.gov.au/topics/heritage/manage-heritage-items/heritage-consultants-directory>

Table 11 Actions for engaging suitably qualified contractors and specialists.

Management area	Actions		Timing
7 Qualified contractors and skilled tradespeople	7.1	MTS will use suitably qualified contractors and skilled tradespeople for all works on heritage assets with the LMA.	Operations
	7.2	MTS will establish a quality assured heritage contractor panel and traditional trades list.	Prior to maintenance and repair work to heritage assets
8 Heritage services	8.1	The MTS heritage specialist will assist with preparing approval documentation where required and provide ad hoc heritage advice.	Operations
	8.2	Appropriately qualified and experienced archaeologists that meet the criteria for Excavation Directors* will be engaged to work within the MTS LMA.	Operations

Note: Excavation Director\* - MTS will only engage in a consultancy capacity an Excavation Director in the event of suspected significant historical archaeology being discovered during operations and maintenance activities. It is not intended to have this role within MTS' staff establishment.

## 3.7. Heritage awareness and training

In order to ensure that potential heritage impacts are appropriately managed, it is important that all MTS and Sydney Metro personnel and contractors are aware of the heritage assets and their obligations in protecting them.

Heritage awareness processes including training and training manuals, public and media information and general heritage promotion are to be developed in consultation with Sydney Metro.

Refresher training will be delivered at yearly intervals. and as required, following site inspections and other actions such as audits, task updates, new discoveries or changes in the condition of heritage items that are not in accordance with the HMP.

Site induction that includes heritage awareness will be conducted by Safety Officers, Site Managers or other designated personnel for all project staff including contractors, sub-contractors and suppliers prior to any maintenance or other physical work undertaken.

Site induction will inform site personnel about the requirements for the management of heritage and archaeological assets during the works and their obligations for protection from potential impact.

Heritage promotion including information dissemination and events will be managed in tandem with Sydney Metro, heritage specialists and event organisers to ensure a coordinated and well-informed delivery.

*Table 12 Actions for heritage awareness and training*

	<b>Actions</b>	<b>Timing</b>
<b>9 Heritage awareness and training</b>	9.1 MTS will develop a heritage specific induction for all staff and contractors.	Prior to operations
	9.2 MTS will develop station specific inductions for Heritage Conservation Register (HCR) listed stations in consultation with the heritage specialist. The induction will be delivered to all staff and contractors working at the station prior to operations or work.	Prior to operations

## 3.8. Interpretation

A range of interpretive elements have been developed for the project, with site-specific interpretive stories and media types developed for each location, including interpretive panels/signs, ground plane inserts, artworks, plaques, wall features, plantings, conserved fabric/elements, etc. These interpretive elements must be maintained and checked for damage on a regular basis – a six-monthly cleaning and maintenance program is recommended.

Where heritage items and/or significant archaeological remains are impacted by necessary critical maintenance works consideration would be given to their interpretation. A site-specific CMP or CMS should include guidelines for interpretation in accordance with the existing Heritage Interpretation Plans for each location. An MTS Public Art Plan has been prepared to guide the maintenance and operation of the artworks at each of the Metro Stations.

*Table 13 Actions for engaging suitably qualified contractors and specialists.*

<b>Management area</b>	<b>Actions</b>	<b>Timing</b>
<b>10 Qualified contractors</b>	10.1 MTS will use suitably qualified contractors for all works on heritage assets with the LMA.	In place for full operations in 2026.
	10.2 MTS will establish a quality assured heritage contractor panel and traditional trades list.	In place for full operations in 2026.
<b>11 Heritage services</b>	11.1 MTS will engage suitably qualified heritage consultants to assist with preparing permit documentation and to provide ad hoc heritage advice.	In place for full operations in 2026.
	11.2 Appropriately qualified and experienced archaeologists that meet the criteria for Excavation Directors will be engaged to work within the MTS LMA.	In place for full operations in 2026.

## 4. Heritage approvals and record keeping

### 4.1. Introduction

Where work is required to heritage assets in the LMA, the following process would be followed in relation to heritage approvals and record keeping.

### 4.2. State Heritage Register listed assets

#### 4.2.1. S60 Approval

All works undertaken to a SHR listed heritage asset which have not been assessed as meeting the criteria for a Standard Heritage Exemption (Section 4.2.2) must make an application under S60 of the Heritage Act for an Approval.

Works which require a S60 Approval require the following support documentation:

- Statement of Heritage Impact (SoHI).
- Conservation Management Plan (if this is not available this may be required as a condition of the approval).
- Drawing documentation which details the proposed works.
- Materials and finishes.
- Renders.

When there is known or suspected historical archaeology to manage, the following supporting information should be included:

- Excavation Director details, CV and response to the criteria for assessing Excavation Directors.
- Archaeological assessment report.
- Archaeological research design and excavation methodology.

If the SoHI assesses the works may have a minor impact or the potential to have a minor impact to the heritage item, the proposed works may qualify for a Fast Track S60. To qualify for a Fast Track S60 the following criteria must be met:

- to an item listed on the SHR or subject to an interim heritage order
- that will have little or no adverse impact on the heritage significance of an item, in the opinion of the Heritage Council (or its delegate)
- that are not listed as a standard exemption or site-specific exemption under the Heritage Act
- that have an estimated cost of up to \$150,000
- that accord with relevant guidelines.

All works which do not meet the criteria for a Fast Track S60 would require a standard S60 Approval.

Once works are approved under a Fast Track S60 they are not able to be modified, and any modifications to the works would require a new application.

Works which are approved under a S60 application would be eligible for a modification under S65A of the Heritage Act, provided the modification meets the following criteria:

- (1) On application in the approved form by any person entitled to act on an approval, the approval body may modify the approval—
  - (a) so as to vary any aspect of the original approval, but only if it is satisfied that the act, matter or thing authorised by the modified approval is substantially the same as the act, matter or thing authorised by the original approval, or

(b) so as to correct a minor error, misdescription or miscalculation.

Note: s60 applications for standard approvals require a minimum 40-day review period at Heritage NSW. This should be factored into the project planning process.

*Table 14 Actions for s60 and s65A Approvals*

	<b>Actions</b>	<b>Responsibility</b>
<b>1 Confirm heritage status</b>	1.1 MTS Staff to confirm heritage status of building or element prior to the assessment and approval of works.	MTS Heritage Advisor
<b>2 Fast Track s60</b>	2.1 Prepare a Fast Track s60 if works meet the following: <ul style="list-style-type: none"> <li>• to an item listed on the State Heritage Register or subject to an interim heritage order;</li> <li>• that will have little or no adverse impact on the heritage significance of an item, in the opinion of the Heritage Council (or its delegate);</li> <li>• that are not listed as a standard exemption or site-specific exemption under the Heritage Act 1977;</li> <li>• that have an estimated cost of up to \$150,000;</li> <li>• that accord with relevant guidelines.</li> </ul>	MTS Heritage Advisor
<b>3 s60 Approval</b>	3.1 Prepare an application for an Approval under s60 of the Heritage Act if the works: <ul style="list-style-type: none"> <li>• do not meet the threshold for s57 Standard Exemptions or Site-Specific Exemptions;</li> <li>• have an estimated cost more than \$150,000;</li> <li>• have been assessed by a SoHI to have a more than minor impact on the significance of the SHR item.</li> </ul>	MTS Heritage Advisor
<b>4 Variation s65A applications</b>	4.1 If there is a modification to proposed works under a s60 approval – this can be modified if they are: <ul style="list-style-type: none"> <li>• minor corrections;</li> <li>• clarifications;</li> <li>• amendments;</li> <li>• additional work.</li> </ul>	MTS Heritage Advisor
<b>5 Submission of applications for approvals</b>	5.1 Sydney Metro Senior Heritage Advisor will submit all applications for approvals via the Heritage Management System.	Sydney Metro Senior Heritage Advisor
<b>6 Compliance</b>	6.1 MTS to monitor and retain records of compliance with the approved works as issued under s60 of Heritage Act.	MTS Heritage Advisor
	6.2 MTS to provide technical review and quality assurance of all heritage	MTS Heritage Advisor

	Actions	Responsibility
	deliverables prepared by MTS heritage contractors.	
6.3	Respond to Sydney Metro requests for further information to support heritage approval and notifications.	MTS Heritage Advisor
6.4	Disseminate heritage approvals and endorsement, and associated conditions, with MTS business units.	MTS Heritage Advisor

## 4.2.2. Standard Heritage Exemptions

Under s57(2) of the Heritage Act, some works to the SHR heritage items may meet the criteria for exemption under the Standard Heritage Exemptions. Assessment of the works applicability to the exemptions should be undertaken by a qualified heritage consultant.

Standard Exemptions are self-assessed. It is the responsibility of MTS to ensure that the proposed activities/works fall within the threshold for Standard Exemptions. This should be assessed by a qualified heritage consultant.

MTS is responsible for ensuring that any activities/works undertaken by them meet all the Relevant standards and have all necessary approval. Records must be kept of all activities/works for auditing and compliance purposes by the Heritage Council.

Works which may meet the criteria for exemption under the Heritage Act are summarised in Table 15. A full list of the exemptions including general conditions should be consulted prior to undertaking the works.

Table 15 Activities which are considered exempt under Section 57(2) of the Heritage Act

Standard exemption	Explanation
<b>1. Maintenance and cleaning</b>	This exemption is for maintenance and cleaning which is part of the continuous protective care of a place, including the fabric and setting of a place. Examples of typical maintenance and cleaning activities/works include: <ul style="list-style-type: none"> <li>• washing surfaces to remove grime;</li> <li>• removing vegetation and litter from gutters and drainage systems;</li> <li>• lubricating equipment which has moving parts;</li> <li>• applying protective coatings to surfaces which have previously had such coatings, for example limewash, polish, oils and waxes.</li> </ul>
<b>2. Repairs to non-significant fabric</b>	This exemption is for repair or replacement of damaged or deteriorated non-significant fabric of a heritage item that is beyond further maintenance.           Examples of typical repair activities/works include: <ul style="list-style-type: none"> <li>• refixing palings that have fallen off a fence;</li> <li>• patching damaged plaster;</li> <li>• regrouting tiles;</li> <li>• replacing decayed/destroyed roof gutters with new gutters on a building.</li> </ul>
<b>3. Repair and replacement of significant fabric</b>	This exemption is for minor repair and replacement of significant fabric that is beyond further maintenance.
<b>4. Alterations to non-significant fabric</b>	This exemption is for alterations to non-significant fabric and/or the removal of non-significant fabric. It is not for demolishing or constructing whole structures or buildings.           Examples of typical repair activities include:

Standard exemption	Explanation
	<ul style="list-style-type: none"> <li>• reopening a closed pre-existing fireplace;</li> <li>• removing single glazed non-significant window and installing double glazed window;</li> <li>• replacing non-significant bathroom finishes/surfaces such as tiles, and fixtures such as vanities, shower cabins and baths;</li> <li>• installing built-in units (e.g. bookshelf) to non-significant walls.</li> </ul>
<b>5. Alteration to interiors of non-significant buildings</b>	<p>This exemption is for alterations to the inside of non-significant buildings.</p> <p>Non-significant buildings must be:</p> <ul style="list-style-type: none"> <li>• identified as non-significant in a heritage management document or written advice prepared by a suitably qualified and experienced heritage professional and/or;</li> <li>• constructed since the listing of the item on the State Heritage Register or protected by an interim heritage order.</li> </ul> <p>Examples of typical alteration activities/works include:</p> <ul style="list-style-type: none"> <li>• refurbishment or renovation of interiors of non-significant buildings;</li> <li>• replacement of fabric inside non-significant buildings.</li> </ul>
<b>6. Repair or replacement of existing non-significant utility and services infrastructure</b>	<p>This exemption is for the repair or replacement of services that are not of heritage significance.</p> <p>Examples of typical service repair or replacement activities include:</p> <ul style="list-style-type: none"> <li>• rewiring of electrical fittings;</li> <li>• replace light fixtures and fittings with energy efficient alternatives;</li> <li>• repair to mechanical parts of a boiler or engine.</li> </ul>
<b>7. Non-significant telecommunications facilities and water, wastewater and stormwater infrastructure</b>	<p>This exemption is for the upgrade or installation of telecommunication facilities and water, wastewater and stormwater infrastructure that is not of heritage significance.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>• increasing the size or number of antennae on an approved tower or fixing point;</li> <li>• installation of new telephone and/or internet cabling;</li> <li>• upgrade of a communications switchboard.</li> </ul>
<b>8. Fire safety, suppression and detection and security systems</b>	<p>This exemption is for upgrading, installing and/or removing fire safety detection or alarm systems, fire suppression systems and security systems.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>• installation of fire alarms, sprinklers, hydrants and hose reels;</li> <li>• installation of security camera, locks and alarms;</li> <li>• rewiring of heat or smoke detectors;</li> <li>• upgrade of a fire panel;</li> <li>• upgrade of evacuation lighting.</li> </ul>
<b>9. Excavation</b>	<p>This exemption is for minor excavation or disturbance of land without removal of State significant relics.</p>

Standard exemption	Explanation
	<p>Examples of typical minor excavation or disturbance activities include excavation:</p> <ul style="list-style-type: none"> <li>• to locate services;</li> <li>• of an existing service trench to inspect, maintain or repair underground services;</li> <li>• to access and repair building foundations;</li> <li>• to remove contaminated soil;</li> <li>• for the purposes of geotechnical or contamination testing;</li> <li>• as part of insect or vermin eradication.</li> </ul> <p>If substantial intact archaeological relics of State or local significance or any Aboriginal objects are discovered during excavation, you must stop all activities and notify Heritage NSW.</p>
<b>10. Painting</b>	<p>This exemption is for repainting of already painted fabric or the painting of non-significant fabric.</p> <p>Examples of typical activities/works include:</p> <ul style="list-style-type: none"> <li>• removal of peeling, flaking or otherwise failed paint;</li> <li>• preparing a surface (e.g. by sanding) for painting;</li> <li>• painting a surface with a suitable paint.</li> </ul> <p>This exemption does not allow for painting of previously unpainted significant fabric (e.g. face brickwork, stone, concrete or metal) as this is likely to adversely affect the item's heritage significance.</p>
<b>11. Restoration of significant fabric</b>	<p>This exemption is for restoration of an item by returning significant fabric to a known earlier location or revealing a known earlier significant configuration.</p> <p>Examples of typical restoration activities include:</p> <ul style="list-style-type: none"> <li>• reassembling and returning significant fabric, such as a garden fountain to its original location;</li> <li>• reopening a closed pre-existing doorway that forms part of the item's earlier significant configuration;</li> <li>• repointing of deteriorated brick or stone wall mortar using traditional lime/sand mortar.</li> </ul>
<b>12. Strata subdivision of buildings</b>	<p>This exemption is for subdivision of the interior of a building that is not of heritage significance or the exterior of a heritage item for car spaces only.</p>
<b>13. Temporary events and structures</b>	<p>This exemption is for temporary events and/or the erection of a temporary structure(s) for less than 90 consecutive calendar days.</p> <p>Examples include:</p> <ul style="list-style-type: none"> <li>• Mobile food and beverage outlets and vehicles;</li> <li>• marquees, tent or gazebos;</li> <li>• portaloo;</li> <li>• shipping containers;</li> <li>• performance stages and staging equipment;</li> <li>• temporary event activities.</li> </ul>
<b>14. Vegetation, invasive species management and bush regeneration</b>	<p>This exemption is for vegetation and landscape maintenance-based tasks.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>• weeding;</li> </ul>

Standard exemption	Explanation
	<ul style="list-style-type: none"> <li>• mowing and pruning;</li> <li>• planting including seasonal rotation of species;</li> <li>• mulching;</li> <li>• monitoring, control and removal of pest plants and animals.</li> </ul>
<b>15. Burial sites and cemeteries</b>	<p>This exemption is for burial sites, cemeteries and their elements including headstones, footstones, burial markers or monuments, grave kerbing, grave railings, grave furniture, enclosures and plantings.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>• excavation of a new grave;</li> <li>• interment of ashes;</li> <li>• erection of a monument or grave marker;</li> <li>• maintenance of graves.</li> </ul>
<b>16. Signage</b>	<p>This exemption is for installation of certain types of temporary signage and signage for safety, assisting navigation of heritage items and interpretation of their significance.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>• erecting a temporary real estate sign;</li> <li>• placing a temporary sign in the window of a business;</li> <li>• temporary signage to provide information about safety and/or hazards;</li> <li>• replacing deteriorated or tired interpretation signage;</li> <li>• installing new waymarking signs.</li> </ul>
<b>17. Filming</b>	<p>The exemption allows for the use of an item as a set or backdrop for filming.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>• protection of significant fabric using bumpers or gaskets during filming of a television or online commercial, show or movie;</li> <li>• temporary movement of non-significant elements of the item within the item;</li> <li>• setup of moveable tripods and lighting without penetrations into significant fabric.</li> </ul>
<b>18. Temporary relocation of moveable objects</b>	<p>This exemption is for temporary relocation of moveable objects (i.e. a moveable object identified on the State Heritage Register or gazetted in an Interim Heritage Order that is not a relic).</p> <p>Examples of typical activities include relocation of a/an:</p> <ul style="list-style-type: none"> <li>• archive during cleaning of the archive's storage facility;</li> <li>• object to a conservator's premises for the purpose of approved conservation works or repairs exempt from approval under another exemption;</li> <li>• collection from storage to a display or vice versa;</li> <li>• railway rolling stock for a demonstration or field day.</li> </ul> <p>Permanent relocation of a movable heritage item requires approval under Section 60 of the <i>Heritage Act 1977</i>.</p>
<b>19. Compliance with minimum standards and orders</b>	<p>This exemption is for activities required to meet the minimum standards of maintenance and repair or as part of an order issued for a heritage item.</p>

Standard exemption	Explanation
	<p>The Minimum Standards of Maintenance and Repair are contained in Part 3 of the Heritage Regulation 2012. They apply to all items listed on the State Heritage Register (SHR) or subject to an interim heritage order (IHO). Owners of SHR and IHO are required to ensure their heritage item meets the minimum standards of maintenance and repair.</p> <p>Orders may be issued to remedy an action or failure to maintain and repair.</p> <p>Examples of typical activities relate to:</p> <ul style="list-style-type: none"> <li>• weather protection;</li> <li>• fire prevention and protection;</li> <li>• security; and</li> <li>• essential maintenance and repair to prevent serious or irreparable damage.</li> </ul>
<b>20. Site safety and security</b>	<p>This exemption is for the temporary or emergency securing of a heritage item for the safety of users or the public. It does not allow for the permanent installation or upgrading of site or building safety and/or security measures.</p> <p>This exemption may be used where there has been unexpected damage caused by an unexpected event, rather than safety risks that arise from ongoing neglect of maintenance.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>• erection of temporary security fencing around a sink hole to prevent access;</li> <li>• placement of a temporary security camera to monitor a vulnerable heritage item;</li> <li>• activities to prevent elements of an item that have fallen from causing an accident;</li> <li>• installation of suitable material to halt erosion to an archaeological site caused by extreme weather;</li> </ul> <p>Any stabilisation activities/works under this exemption must be done with minimal intervention to significant fabric. Emergency maintenance and repairs (such as required following a storm) may be exempt under other standard exemptions. Activities which may damage significant fabric require approval under Section 60 of the Heritage Act.</p>
<b>21. Emergency situations and lifesaving</b>	<p>This exemption is for activities required immediately in an emergency.</p> <p>Emergencies may be natural or man-made. They are serious, unexpected and often dangerous situations requiring immediate action. The nature of the emergency will vary the type of risk to life, the environment and nature of on-site damage to a heritage item/place.</p> <p>Incidents likely to cause serious damage and require actions necessary to save or protect life could include:</p> <ul style="list-style-type: none"> <li>• an uncontrolled escape, spillage or leakage;</li> <li>• an uncontrolled implosion, explosion or fire;</li> <li>• exposed live electrical parts;</li> <li>• collision or fall of something;</li> <li>• collapse or partial collapse of a structure or plant (for example a crane or shoring supporting an excavation).</li> </ul> <p>This exemption permits people on site and emergency personnel to do what is necessary to save or protect human</p>

Standard exemption	Explanation
	life and/or secure the safety of a ship, the environment or a heritage item endangered by an incident such as those listed above.
<b>22. Additional or temporary change of use</b>	This exemption allows for minor changes of use that will not affect the item's heritage significance.
<b>23. Energy saving and sustainable technologies</b>	<p>This exemption is for the installation of energy saving and sustainable technologies such as insulation, draught proofing, small-scale solar energy systems, battery systems, small wind turbine systems (see glossary of terms for details).</p> <p>It does not apply to:</p> <ul style="list-style-type: none"> <li>State Heritage items that have outstanding universal value (cultural and/or natural heritage) and are listed on the UNESCO World Heritage List;</li> <li>State Heritage Register items that are listed on the National Heritage List or Commonwealth Heritage List;</li> <li>fixings that impact slate or timber singled roofs.</li> </ul> <p>When proponents are undertaking this activity, they should consider the guidance in the Solar panels practice note and the Sustainable heritage buildings guide available on the Heritage NSW website.</p> <p>Any activities under this exemption must be done with minimal intervention to significant fabric.</p>
<b>24. Accessibility measures</b>	<p>This exemption is for activities that make heritage buildings more accessible.</p> <p>Examples of typical activities include the installation of:</p> <ul style="list-style-type: none"> <li>access ramps</li> <li>lifts</li> <li>hand rails.</li> </ul>
<b>25. Aboriginal cultural practices</b>	<p>This exemption is for activities that relate to Aboriginal cultural practices.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>caring for and connecting to Country and heritage places;</li> <li>ceremonies;</li> <li>sharing of knowledge and stories.</li> </ul> <p>This exemption does not apply to commercial activities.</p>
<b>26. Agricultural operations</b>	This exemption is for the day-to-day activities required to manage agricultural property, such as fencing.
<b>27. Bushfire management</b>	<p>This exemption is for activities related to bushfire risk management.</p> <p>Examples of typical activities include:</p> <ul style="list-style-type: none"> <li>controlled burning</li> <li>removal of vegetation;</li> <li>other hazard reduction activities.</li> </ul>

Each of these Standard Exemption criteria has specific guidelines and general conditions which must be complied with in order to satisfy the threshold for exempt work.

More information can be found at the NSW Heritage website for Standard Exemptions

<https://www.environment.nsw.gov.au/topics/heritage/apply-for-heritage-approvals-and-permits/state-heritage-register-items/standard-exemptions>

Table 16 Actions for s57(2) Standard Heritage Exemptions

	Action	Responsibility
1 Standard Exemptions S57(2)	1.1 Confirm with MTS staff heritage listing status of the item	MTS Heritage Advisor
	1.2 Assess if proposed works meet the threshold for one or more Standard Heritage Exemptions	MTS Heritage Advisor with input from MTS heritage specialist where required
	1.3 Keep records of the assessment and documentation of the proposed work as well as records of work once completed	MTS Heritage Advisor with input from MTS heritage specialist where required
2 Compliance	2.1 MTS to retain records of compliance with work carried out under standard exemptions	MTS Heritage Advisor
	2.2 MTS to provide technical review and quality assurance of MTS heritage specialist advice	MTS Heritage Advisor
	2.3 Respond to Sydney Metro requests for further information to support heritage approval and notifications	MTS Heritage Advisor
	2.4 Disseminate heritage approvals and endorsement, and associated conditions, with MTS business units	MTS Heritage Advisor

## 4.3. Archaeology

### 4.3.1. Disturbance of historical archaeological relics outside SHR curtilages

#### 4.3.1.1. Excavation permit under Section 140

Excavation permits to allow disturbance and/or removal of archaeological 'relics' are issued by the Heritage Council of NSW, or its Delegate, under Section 140 of the Heritage Act. An application for an excavation permit must be supported by an Archaeological Assessment and Research Design (AARD) and Archaeological Assessment prepared in accordance with the Heritage NSW archaeological guidelines.

#### 4.3.1.2. Archaeological exceptions under Section 139 (4)

Minor works that would have a minimal impact on archaeological relics of local significance may be granted an exception under Section 139 (4) of the Heritage Act. The following disturbance or excavation of land does not require an excavation permit under the Heritage Act:

- Any disturbance or excavation of land that has limited archaeological research potential, as demonstrated by a heritage management document, such as an Archaeological Assessment, completed within the last five years.
- Any disturbance or excavation of land that constitutes minor works involving limited impact to relics of local heritage significance, in accordance with **'Relics of local heritage significance: a guide for minor works work with limited impact'** published by Heritage NSW.
- Any disturbance or excavation of land that constitutes minor works involving limited impact to relics of local heritage significance as demonstrated by a heritage management document, such as an Archaeological Assessment, completed within the last five years.

- (d) Any disturbance or excavation of land for archaeological test excavation of relics of local heritage significance completed in accordance with the guidelines '**Relics of local heritage significance: a guide for archaeological test excavation**' published by Heritage NSW.
- (e) Any disturbance or excavation of land for archaeological monitoring of relics of local heritage significance completed in accordance with the guidelines '**Relics of local heritage significance: a guide for archaeological monitoring**' published by Heritage NSW.

The exceptions are self-assessed, and it is the responsibility of the proponent to ensure that the proposed works fall within these exceptions.

*Table 17 Actions for disturbing areas of relics or historical archaeological potential*

	<b>Actions</b>	<b>Responsibility</b>
<b>7 Confirm archaeological potential</b>	7.1 MTS Staff to confirm if work is within an area of archaeological potential as defined in the station specific CMP or CMS.	MTS Heritage Advisor
	7.2 Where ground disturbing work is required in an area of archaeological potential or would affect a known archaeological relic, seek advice from an Excavation Director.	MTS Heritage Advisor and an Excavation Director
<b>8 Exceptions under S139(4)</b>	<ul style="list-style-type: none"> <li>Excavation Director to confirm work can be carried out in accordance with the exceptions.</li> <li>Keep records of the assessment and documentation of the proposed work as well as records of the work once completed.</li> <li>Follow the Sydney Metro's Unexpected Heritage Finds Procedure.</li> </ul>	MTS Heritage Advisor with input from an Excavation Director
<b>9 S140 approval</b>	9.1 Prepare an application for an Approval under S140 of the Heritage Act where the work will: <ul style="list-style-type: none"> <li>disturb or excavate land that is likely to contain archaeological relics of state significance.</li> <li>have a major impact on relics of local significance.</li> </ul> <p>The application must include:</p> <ul style="list-style-type: none"> <li>archaeological assessment report</li> <li>archaeological research design and excavation methodology</li> <li>Excavation Directors' details, CV and response to the Criteria for assessing Excavation Directors</li> </ul>	MTS Heritage Advisor with input from an Excavation Director
<b>10 Submission of applications for approvals</b>	10.1 Sydney Metro Senior Heritage Advisor will submit all applications for approvals via the Heritage Management System	Sydney Metro Senior Heritage Advisor
<b>11 Compliance</b>	11.1 MTS to monitor and retain records of compliance with the approved works as issued under S139 or S140 of the Heritage Act.	MTS Heritage Advisor

	Actions	Responsibility
	11.2 MTS to provide technical review and quality assurance of advice from an Excavation Director	MTS Heritage Advisor
	11.3 Respond to Sydney Metro requests for further information to support heritage approval and notifications	MTS Heritage Advisor
	11.4 Disseminate heritage approvals and endorsement, and associated conditions, with MTS business units	MTS Heritage Advisor

## 4.4. Heritage and Conservation Register (HCR) listed assets not on the SHR

MTS will identify the planning approval pathway for the work. Where required, heritage will be considered as part of the assessment and approval process.

### 4.4.1. Minor works not requiring approval

Minor work to HCR assets not on the SHR is defined as activities with little to no impact on its heritage significance and support its ongoing management including:

- maintenance and clearing
- repairs to non-significant fabric
- alterations to non-significant fabric
- alterations to interiors of non-significant buildings
- repair or replacement of non-significant services (mechanical, electrical, plumbing)
- non-significant telecommunications infrastructure
- fire safety detection and alarm systems
- minor excavation or disturbance of land which would not affect Aboriginal objects, known archaeological relics or areas of Aboriginal or historical archaeological potential as defined in the applicable CMP or CMS
- painting
- restoration of significant fabric in accordance with the applicable CMP or CMS
- temporary structures
- landscape maintenance including weeding, mowing and pruning, planting seasonal rotation of species and mulching
- temporary signage
- temporary relocation of movable heritage items
- compliance with minimum standards of maintenance and repair.

The definition for minor work to HCR listed assets not on the SHR is consistent with the standard exemptions under the Heritage Act.

Records must be kept of all minor work. The SHR Standard Exemption Record Keeping Form will be used for all minor work to HCR assets not on the SHR.

### 4.4.2. Work with more than a minor impact to heritage significance

For all works to heritage fabric, the works approval pathway identified in the OEMP including environmental management and monitoring protocols should be followed. Prior to working on heritage fabric, MTS will comply with

procedures outlined in the Heritage Management Plan. MTS will identify the planning approval pathway for the work. Where work with more than a minor impact is anticipated, a heritage specialist will prepare a SoHI in accordance with the Heritage NSW Guidelines for statements of heritage impact and the applicable CMP or CMS. The work will be completed in consultation with Sydney Metro.

Table 18 Record keeping requirements for HCR assets not on the SHR

Management area	Action	Responsibility
<b>1 Compliance with CMP or CMS</b>	1.1 Check compliance of the proposed work with applicable CMPs or CMS, to ensure it consistent with the conservation policies or cyclical maintenance plans.	MTS Heritage Advisor
<b>2 Minor work</b>	2.1 Check if the work meets the definition for minor work. 2.2 Keep records of the assessment and documentation of the proposed work, as well as records of the work once completed. 2.3 Seek advice from heritage specialist to confirm the impact would have little to no impact to the heritage significance of the asset and is consistent with the applicable CMP or CMS where required.	MTS Heritage Advisor with input from MTS heritage specialist where required
<b>3 Work which would have more than a minor impact to the heritage significance of the asset</b>	3.1 Prepare SoHI in accordance with the Heritage NSW Guidelines for preparing a statement of heritage impact and CMP or CMS conservation policies. 3.2 Notify Sydney Metro Senior Heritage Advisor and provide a copy of the SoHI. 3.3 Implement recommendations from the SoHI in consultation with Sydney Metro.	MTS Heritage Advisor and MTS heritage specialist
<b>4 Compliance</b>	4.1 MTS to provide technical review and quality assurance of heritage specialist advice. 4.2 Respond to Sydney Metro requests for further information to support heritage approval and notifications. 4.3 Disseminate heritage approvals and endorsement, and associated conditions, with MTS business units.	MTS Heritage Advisor

## 4.5. Aboriginal Heritage Impact Permit

An Aboriginal Heritage Impact Permit (AHIP) is the only consent that can be obtained under the NPW Act to harm Aboriginal objects. Heritage NSW, DCCEEW are the determining authority for all AHIP applications. Various factors are considered by Heritage NSW, DCCEEW in the AHIP application process, such as site significance, Aboriginal consultation requirements, Ecological Sustainable Development (ESD) principles, project justification and consideration of alternatives.

If an AHIP is required, consultation must be undertaken in accordance with the requirements of Section 60 of the *National Parks and Wildlife Regulation 2019*, as described in the *Aboriginal cultural heritage consultation requirements for proponents 2010* (DECCW 2010b).

## 5. Emergency works

In the event of time-sensitive emergency works being required, the relevant legislative requirements for permits/consent or exemptions are still in place. It is likely that emergency works would be mostly related to existing rail infrastructure and not impacting on significant heritage buildings, fabric or elements of a heritage place. Depending on the nature of emergency works, they may fall also under the standard exemptions for Fire safety, suppression and detection and security systems, Site safety and security or Emergency situations and lifesaving (as outlined in Section 4.2.2, Table 15).

Emergencies may be natural or man-made. They are serious, unexpected and often dangerous situations requiring immediate action. The nature of the emergency will vary the type of risk to life, the environment and nature of on-site damage to a heritage asset.

Incidents likely to cause serious damage and require actions necessary to save or protect life could include:

- an uncontrolled escape, spillage or leakage;
- an uncontrolled implosion, explosion or fire;
- exposed live electrical parts;
- collision or fall of something;
- collapse or partial collapse of a structure or plant (for example a crane or shoring supporting an excavation).

In an emergency, MTS staff and emergency personnel will do what is necessary to save or protect human life, the environment or a heritage asset endangered by an incident such as those listed above.

### 5.1. Actions required for emergency works

#### 5.1.1. Advising relevant authority

The responsible manager must check the heritage status of areas impacted by emergency works to see if they are being undertaken in a listed heritage place. If emergency works must occur within a listed heritage place, MTS must notify Heritage NSW as soon as possible that works have occurred on a State heritage item. This must include a brief explanation as to why the works had to happen, and why it was not possible to notify prior to undertaking the works. Sydney Metro would do this notification; however, MTS will need to supply all the relevant information for this notification.

#### 5.1.2. Emergency works heritage contingency plan

As emergency works can occur at all hours, an Emergency Works Heritage Contingency Plan will be developed by a suitably qualified heritage specialist and form part of this HMP. The plan should include key information to help the Responsible Manager understand the process they need to follow regarding heritage places, for example:

- Notify MTS Manager Rail Safety & Systems > notify MTS Heritage Advisor > notify Sydney Metro Senior Heritage Advisor > notify Heritage NSW as required.

The plan should also include a template for an Emergency Works Heritage Report that must be completed by the Responsible Manager when an incident occurs. The template should include the following types of information that needs to be recorded.

- The name and heritage status of the place (e.g. its SHR/LEP/S170 place name and registration number).
- Whether there are any standing exemptions for the heritage place that apply to the emergency work activities.
- Location of where the emergency works are taking place.
- Description of the emergency works e.g. ballast replacement, track work, etc.
- Brief outline of impacts to the heritage place and/or its identified heritage values.
- Context or reason for the emergency works.

- Names of the work group members undertaking the works and the Responsible Manager.
- Length or expected timeline of the emergency works.
- Before and after photographs of the works site and context within the heritage place.
- Mitigation or management measures in place to protect the heritage components, or values of the site, e.g. protective temporary fencing around worksite to ensure works do not encroach on heritage fabric, heritage briefing, or induction of emergency works crew prior to commencement of emergency works, etc.
- A sign off page for the Responsible Manager and other relevant personnel.

The Emergency Works Heritage Contingency Plan must be disseminated to all relevant work groups within MTS and be included as a standard document within all works approval documentation, contractor information packages and pre-start/induction packs, etc.

### 5.1.3. Existing checklists and tools

MTS should update their existing works checklists, forms or documentation to include a line item about the Emergency Works Heritage Contingency Plan and a check box for whether a copy of the Contingency Plan has been included in the project files and made available to all project contractors and MTS personnel.

Table 19 Recommendation 12 - Emergency Works Heritage Contingency Plan

	Action	Timing
<b>1 Emergency Works Heritage Contingency Plan</b>	1.1 MTS will develop an Emergency Works Heritage Contingency Plan.	Prior to operations
<b>2 Emergency Works Heritage Report template</b>	2.1 MTS will develop an Emergency Works Heritage Report Template which will be included in the next update to this HMP.	Prior to operations

## 6. Reporting requirements

The following section outlines how MTS will meet its reporting requirements related to heritage assets as required by SPR as well as their obligations under the Heritage Act.

The reporting requirements are primarily the responsibility of Sydney Metro, as outlined in the Roles and Responsibilities in Section 7, however MTS are required to provide inputs into Sydney Metro's reports, as well as meet requirements of the Heritage Act in relation to record keeping and reporting related to the management of SHR and S170 listed assets.

### 6.1. Statutory requirements

The standard exemptions and exceptions available under the Heritage Act are only provided on the condition that proper paperwork is completed and managed. Spot checks and audits can occur and there can be financial penalties for breaches of the Heritage Act.

It is recommended that one person within MTS be responsible for creating and maintaining a register of all exempt works undertaken within the LMA, and provide twice yearly updates to SM. As outlined in Section 7, this is currently nominated as the MTS Environment and Sustainability Advisor. Additionally, it is recommended that MTS consult with Sydney Metro (SM) for all work carried out under standard exemptions and exceptions under the Heritage Act.

The example forms provided Example Standard Exemption Record Keeping Form (SMCSWTS2-MTS-1NL-HE-REC-002506) and Example Section 139(4) Exception Record of Use Form (SMCSWTS2-MTS-1NL-HE-REC-002508) should be used and copies retained, along with a master spreadsheet or in an asset management database.

*Table 20 Recommendation 13 – Statutory Reporting Requirements*

Management area	Recommendation	Timing
<b>12 Statutory Reporting Requirements</b>	12.1 The MTS Heritage Advisor is responsible for maintaining the register of all exempt works undertaken within the LMA. Records should use the NSW Heritage Council form and master spreadsheet or asset management database.	Operations
	12.2 MTS should consult with Sydney Metro for all work carried out under standard exemptions.	Operations
	12.3 MTS to provide twice yearly updates to Sydney Metro of works undertaken.	Operations

### 6.2. Sydney Metro annual report

As a state agency, Sydney Metro is required to include details about the management of heritage assets in their annual report. MTS must provide the following information to be included in the annual report as part of the Sydney Metro reporting cycle:

- a demonstration that the principles and guidelines have been adopted as part of the management strategy of heritage assets;
- a statement on the condition of the items listed on the agency's heritage and conservation register and the SHR;
- a register of all works, including scheduled maintenance, completed within the previous 12 months; and

- a register of all correspondence received and issued in respect to management of the heritage assets.

This means that the condition of all SHR and S170 items must be monitored and all works, including maintenance, must be recorded by MTS to be provided to Sydney Metro to meet their reporting requirements ([Table 21](#)).

*Table 21 Recommendation 14 – Reporting Requirements*

Management area	Recommendation	Timing
<b>13 Reporting</b>	13.1 MTS will provide Sydney Metro with twice yearly updates of all works, including maintenance to all heritage assets on the SHR and S170 register.	Twice yearly.

## 6.3. Heritage Council correspondence

Sydney Metro are required to report on any Heritage Council correspondence received and issued in respect to management of all heritage assets. As outgoing correspondence to the NSW Heritage Council is a Sydney Metro responsibility, as outlined in Section 7, MTS should immediately notify Sydney Metro of any incoming correspondence from NSW Heritage Council that is not also provided to SM.

This includes notification of any breaches, notices of potential breaches, warning notices or other correspondence issued by NSW Heritage Council.

## 6.4. Sydney Metro Heritage Working Group

Sydney Metro convenes a heritage working group that meets monthly. Members include representatives from Heritage NSW as delegate for the Heritage Council of NSW, DCCEEW NSW, and Sydney Trains. The Heritage Working Group provides advice to Sydney Metro on heritage matters.

MTS and its heritage specialists will present to the Heritage Working Group as required by Sydney Metro.

## 6.5. Heritage Assets Register

MTS will create and maintain a Heritage Assets Register in Ellipse to ensure that an up-to-date list of Heritage Assets within MTS' LMAs are held at all times. This register will be owned by the MTS Asset Management Team, with input from the Environment and Sustainability Advisor when Heritage Assets are added or changed. Ellipse is an Asset Lifecycle Management software tool which help MTS manage their assets day to day, including from a maintenance viewpoint.

MTS Heritage Advisor will work with the asset management team to establish this in Ellipse.

## 7. Roles and responsibilities

The following section outlines the roles and responsibilities for managing heritage within the MTS LMA.

Table 22 provides a high-level overview of the division of responsibility between MTS and Sydney Metro in managing the Historic Heritage in the MTS LMA.

As roles and titles can change over time, this section should be kept up to date and reviewed regularly.

*Table 22 Roles and responsibilities in managing heritage within the MTS LMA*

Management area	Recommendation	Timing
	relevant section of the HMP and other relevant documents.	

## 8. Compliance and review of this HMP

### 8.1.1. Regular updates and integration

This HMP must be updated at least every 12 months and/or within 28 days of a major non-compliance with the plan. It should also be reviewed and updated in the case of major changes to heritage legislation at a state or local level, or when new guidelines are issued by the NSW Heritage Council. Likewise, if heritage asset listings change, this document should be updated to reflect that change.

*Table 24 Actions for regular updates and integration*

Management area	Actions	Timing
<b>1. Regular updates</b>	1.1 The HMP should be reviewed and updated at least every 12 months and/or within 28 days of a major non-compliance notification.	Every 12 months or sooner.
	1.2 The HMP should be reviewed and updated if any major changes are made to heritage legislation or regulations at a state or local level or if new guidelines are issued by the NSW Heritage Council.	As required.
	1.3 The HMP should be updated if heritage status of listed assets changes or if a new heritage item is listed.	As required.
<b>2. Integration with other conservation management plans and guiding documents</b>	2.1 Metro is in the process of completing the remaining CMPs and CMSs for the Southwest stations. Upon receipt of all the CMPs and CMSs for all the Southwest stations, the HMP should be reviewed, and station specific information and requirements added.	With the completion and submission of all CMPs and CMSs by Metro to MTS
	2.2 This HMP should be updated to include a hyperlink to all CMPs and CMSs when complete.	With the completion and submission of all CMPs and CMSs by Metro to MTS

### 8.1.2. Incidents and non-compliances

Sydney Metro Authority define an environmental Incident as “*an occurrence or set of circumstances, as a consequence of which pollution (air, water, noise, and land) or an adverse environmental impact has occurred or is likely to have occurred.*” All heritage incidents are classified as environmental incidents at MTS.

All Heritage incidents are to be reported to MTS Heritage Advisor as soon as possible and will be recorded in MTS’s SQRE software system (Intelex). MTS also commits to reporting all environmental incidents (including Heritage incidents) to Sydney Metro Authority.

The MTS Heritage Advisor will identify trends in incidents and trends in root causes to suggest the nature of preventative actions which are warranted. Depending on the severity of the event, the location of the incident, as well as any associated plant and equipment, is to be preserved until relevant data and evidence is collected.

Incident investigations will be undertaken for all incidents. The level of investigation will be dependent on the classification of the incident. The incident investigation team will be comprised of staff selected by the GM Safety, Quality, Risk and Environment based on the severity of the incident and the availability of experienced personnel. Details of heritage incidents and resulting corrective or preventative actions will also be included in internal monthly environmental reports.

As part of the incident investigation, corrective and preventative actions will be identified, assigned to the appropriate person and closed out according to set timeframes. Corrective actions will be assigned, tracked and closed out in Intelex. All corrective actions will include reference to the relevant incident record for ease of tracking.

Sydney Metro Authority define Environmental Non-compliances as “*a breach of an Environmental Requirement originating from Planning Approvals, Environment Protection Licenses, lease agreements, and other requirements documented in environmental management plans.*”

Heritage non-compliances with the planning approval are identified through regular asset inspections, monitoring, internal or external audits, response to complaints, community consultation, and responses to incidents. A Sydney Metro Authority Representative and/or a public authority may also raise a non-compliance or issue an improvement notice. All reportable heritage non-compliances are to be reported to SMA within one (1) day of the incident and reported as incidents in Intelex and any corrective actions are to be embedded within the MTS Intelex system and related Operating Procedures and Management Plans.

Following the identification of a non-compliance, corrective and/or preventative actions are identified and assigned to the appropriate person with set timeframes. Timeframes would be set to ensure any chance of recurrence is eliminated as soon as practicable. Intelex is used to assign, track and close out corrective actions.

The incident in Intelex is reviewed regularly to ensure actions are being actioned and closed out in a timely manner. The status of corrective actions is reported for review at the monthly management meeting and reported in the Quarterly and Annual Performance Reports.

## Amendment Record

Date	Rev	Amendment description	By
30/4/2024	01	Creation of the Heritage Management Plan	Peter Scioscia
4/9/2024	02	Updated plan as per Sydney Metro Authority Comments	Peter Scioscia
05/08/2025	03	Updated plan with inclusion of references to CMP's that have been completed and inclusion of new position (Heritage Advisor).	David Wilson
05/08/2025	03	Updated plan with amendments addressing the feedback from SMA.	David Wilson
11/08/2025	03	Standardised some terms, including name of our line and other line abbreviations. Updated list of terms. Updated some job titles to match current org chart.	Peter Simcic / David Wilson
03/09/2025	03	Adding Appendix D Related Documents with referenced documents. Reference to Unexpected Heritage Finds Procedure. Some updated document numbers. Fixed some caption numbering and references to those.	Peter Simcic / David Wilson
10/09/2025	03	Clearer wording on Executive Summary. Restoration of deed compliance tables with current references to HMP sections showing compliance. Restored website references as section 9.	Peter Simcic
12/09/2025	03	Restored list of heritage sites from register check as Appendix F. Change of signatories.	Peter Simcic
12/11/2025	04	Updated all heritage listings including s170 details. Removed information duplication e.g. listing tables. Updated document references and pending information statuses. Updated references to Unexpected Heritage Finds Procedure – referencing only Sydney Metro's document as per advice. Updated text as recommended by Sydney Metro's feedback.	Adiba Rahman
19/12/2025	04	Additional note added for Excavation Director in section 3.6. Updated role and responsibilities in Section 7.	Adiba Rahman
05/01/2026	04	Updated the general exemptions in Section 4. Change of signatories.	Adiba Rahman / Peter Simcic

## Appendix D. Related Documents

**Note:** some documents will be closely interconnected and will need to be reviewed when this one is changed.

Those will be marked yes in the review column below.

Others are simply related content that supplement the material in this document.

Document Number	Document Title	Review
SMCSWTS2-MTS-1NL-HE-REC-002506	Example Standard Exemption Record Keeping Form	Yes
SMCSWTS2-MTS-1NL-HE-REC-002508	Example Section 139(4) Exception Record of Use Form	Yes
SMCSWTS2-MTS-1NL-HE-REC-002509	Minimum Standards of Maintenance and Repair	Yes
SM-20-00099497	Unexpected Heritage Finds Procedure	Yes

# Appendix E. List of Terms and Glossary

The following terms, abbreviations and definitions are used in this plan.

Table 27 Terms and Definitions

Terms	Definitions
<b>AHIMS</b>	Archaeological Heritage Information Management Service
<b>AHIP</b>	Aboriginal Heritage Impact Permit
<b>Archaeological Potential</b>	Potential for a site to contain archaeological remains. This potential is assessed by identifying former land uses and associated features through historical research and evaluating whether subsequent actions (either natural or human) may have impacted on evidence for these former land uses.
<b>AARD</b>	Archaeological Assessment and Research Design
<b>ACHAR</b>	Aboriginal Cultural Heritage Assessment Report
<b>AWMS</b>	Archaeological Work Method Statement
<b>CHL</b>	Commonwealth Heritage List
<b>CMP</b>	Conservation Management Plan
<b>CMS</b>	Conservation Management Strategy
<b>CoA</b>	Conditions of Approval
<b>CSSI</b>	Critical State Significant Infrastructure
<b>DCCEEW</b>	Department of Climate Change, Energy, Environment and Water
<b>DCP</b>	Development Control Plan
<b>DPHIE</b>	Department of Planning, Housing, Infrastructure and Environment
<b>EIS</b>	Environmental Impact Statement
<b>EP&amp;A Act</b>	<i>Environmental Planning and Assessment Act 1979</i>
<b>EPBC</b>	Environmental Protection and Biodiversity Conservation
<b>ESD</b>	Ecological Sustainable Development
<b>HCR</b>	Heritage Conservation Register
<b>Heritage Act</b>	<i>Heritage Act 1977</i>
<b>HNSW</b>	Heritage NSW
<b>HIA</b>	Heritage Impact Assessment
<b>HIS</b>	Heritage Interpretation Strategy
<b>HMP</b>	Heritage Management Plan
<b>LEP</b>	Local Environmental Plan

Terms	Definitions
<b>LMA</b>	Licensed Maintenance Area
<b>Local significance</b>	An item is important in the course or pattern of the local area's cultural or natural history.
<b>MTS</b>	Metro Trains Sydney
<b>NHL</b>	National Heritage List
<b>NP&amp;W Act</b>	<i>National Parks &amp; Wildlife Act 1974</i>
<b>OpCo2</b>	Operating Company Number 2
<b>O&amp;M</b>	Operations and Maintenance
<b>OTS2</b>	Operations, Trains and Systems 2
<b>PAD</b>	Potential Archaeological Deposit
<b>PPP</b>	Public Private Partnership
<b>RAPs</b>	Registered Aboriginal Parties. As defined in the Aboriginal cultural heritage consultation requirements for proponents 2010
<b>Research Potential</b>	An item has potential to yield information that will contribute to an understanding of the NSWs (or the local area's) cultural or natural history. It is possible for an area to be of high archaeological potential but low research potential.
<b>S170</b>	Section 170 of the <i>Heritage Act 1977</i>
<b>SEPP</b>	State Environmental Planning Policy
<b>SHR</b>	State Heritage Register
<b>SM</b>	Sydney Metro
<b>SMA</b>	Sydney Metro Authority
<b>SMCSW</b>	Sydney Metro City and Southwest
<b>SMNW</b>	Sydney Metro Northwest
<b>SMS</b>	Safety Management System
<b>SoHI</b>	Statement of Heritage Impact
<b>SPR</b>	Scope and Performance Requirements
<b>SW</b>	Southwest
<b>TAHE</b>	Transport Asset Holding Entity
<b>The Burra Charter</b>	<i>The Australian ICOMOS Charter for Places of Cultural Significance</i> (Adopted 31 October 2013)
<b>TISEPP</b>	Transport and Infrastructure State Environmental Planning Policy
<b>WHL</b>	World Heritage List
